University Exams Previous Year Practice 2024 (2024)

Subject: General | Topic: C Programming

1. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)

2. Which statement best describes the stack in C Programming? (variation 75)

3. Which statement best describes the stack in C Programming? (variation 85)

4. Which statement best describes pointers in C Programming? (variation 100)

5. Which statement best describes the stack in C Programming? (variation 105)

6. Which statement best describes pointers in C Programming? (variation 90)

7. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)

8. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)

9. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

10. When working with C Programming, why would a developer use arrays?

11. Which option is a correct use case for structs in C Programming? (variation 83)

12. What is the most accurate beginner-level explanation of malloc? (variation 72)

13. What is the most accurate beginner-level explanation of malloc? (variation 352)

14. When working with C Programming, why would a developer use null terminator?

15. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)

16. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)

17. Which statement best describes pointers in C Programming? (variation 350)

18. Which statement best describes pointers in C Programming?

19. What is the most accurate beginner-level explanation of malloc? (variation 92)

20. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)

21. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)

22. Which statement best describes the stack in C Programming? (variation 355)

23. When working with C Programming, why would a developer use null terminator? (variation 96)

24. Which option is a correct use case for structs in C Programming? (variation 73)

25. Which option is a correct use case for preprocessor macros in C Programming?

26. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)

27. When working with C Programming, why would a developer use arrays? (variation 81)

28. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)

29. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)

30. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)

31. Which statement best describes the stack in C Programming?

32. Which statement best describes pointers in C Programming? (variation 80)

33. What is the most accurate beginner-level explanation of malloc? (variation 102)

34. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)

35. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)

36. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)

37. When working with C Programming, why would a developer use arrays? (variation 101)

38. What is the most accurate beginner-level explanation of pass by pointer?

39. When working with C Programming, why would a developer use null terminator? (variation 356)

40. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)

41. A student says 'header files' is not relevant to real projects. What is the best correction?

42. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)

43. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)

44. When working with C Programming, why would a developer use arrays? (variation 71)

45. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)

46. What is the most accurate beginner-level explanation of malloc?

47. Which statement best describes pointers in C Programming? (variation 70)

48. Which option is a correct use case for structs in C Programming? (variation 103)

49. When working with C Programming, why would a developer use arrays? (variation 91)

50. Which statement best describes the stack in C Programming? (variation 95)

51. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)

52. Which option is a correct use case for structs in C Programming? (variation 93)

53. What is the most accurate beginner-level explanation of malloc? (variation 82)

54. When working with C Programming, why would a developer use null terminator? (variation 76)

55. When working with C Programming, why would a developer use null terminator? (variation 86)

56. When working with C Programming, why would a developer use arrays? (variation 351)

57. Which option is a correct use case for structs in C Programming?

58. Which option is a correct use case for structs in C Programming? (variation 353)

59. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)

60. When working with C Programming, why would a developer use null terminator? (variation 106)
