

CBSE Previous Year Practice 2017 (2017)

Subject: General | Topic: Python Programming

1. When working with Python Programming, why would a developer use dictionaries? (variation 91)
2. Which option is a correct use case for classes in Python Programming? (variation 83)
3. When working with Python Programming, why would a developer use dictionaries? (variation 81)
4. When working with Python Programming, why would a developer use virtual environments? (variation 96)
5. Which statement best describes modules in Python Programming? (variation 75)
6. What is the most accurate beginner-level explanation of function parameters? (variation 72)
7. Which option is a correct use case for decorators in Python Programming? (variation 108)
8. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
9. Which statement best describes list comprehensions in Python Programming? (variation 70)
10. Which option is a correct use case for classes in Python Programming? (variation 73)
11. Which statement best describes modules in Python Programming? (variation 105)
12. What is the most accurate beginner-level explanation of iterators?
13. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
14. What is the most accurate beginner-level explanation of function parameters? (variation 92)
15. What is the most accurate beginner-level explanation of iterators? (variation 357)
16. When working with Python Programming, why would a developer use dictionaries? (variation 101)
17. A student says 'file handling' is not relevant to real projects. What is the best correction?

18. What is the most accurate beginner-level explanation of function parameters? (variation 102)
19. When working with Python Programming, why would a developer use dictionaries?
20. What is the most accurate beginner-level explanation of function parameters?
21. When working with Python Programming, why would a developer use virtual environments? (variation 106)
22. Which statement best describes modules in Python Programming? (variation 85)
23. Which statement best describes modules in Python Programming?
24. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
25. Which statement best describes list comprehensions in Python Programming? (variation 80)
26. Which option is a correct use case for decorators in Python Programming? (variation 358)
27. When working with Python Programming, why would a developer use dictionaries? (variation 71)
28. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
29. What is the most accurate beginner-level explanation of function parameters? (variation 352)
30. What is the most accurate beginner-level explanation of iterators? (variation 77)
31. Which option is a correct use case for classes in Python Programming? (variation 103)
32. What is the most accurate beginner-level explanation of iterators? (variation 87)
33. What is the most accurate beginner-level explanation of iterators? (variation 97)
34. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
35. Which option is a correct use case for classes in Python Programming? (variation 353)
36. When working with Python Programming, why would a developer use virtual environments? (variation 356)

37. Which option is a correct use case for decorators in Python Programming? (variation 88)
38. When working with Python Programming, why would a developer use virtual environments? (variation 76)
39. Which statement best describes modules in Python Programming? (variation 355)
40. Which statement best describes list comprehensions in Python Programming? (variation 350)
41. When working with Python Programming, why would a developer use virtual environments?
42. Which option is a correct use case for decorators in Python Programming? (variation 78)
43. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
44. When working with Python Programming, why would a developer use dictionaries? (variation 351)
45. Which statement best describes list comprehensions in Python Programming? (variation 100)
46. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
47. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
48. Which option is a correct use case for decorators in Python Programming?
49. What is the most accurate beginner-level explanation of function parameters? (variation 82)
50. When working with Python Programming, why would a developer use virtual environments? (variation 86)
51. What is the most accurate beginner-level explanation of iterators? (variation 107)
52. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
53. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
54. Which statement best describes modules in Python Programming? (variation 95)
55. Which option is a correct use case for classes in Python Programming?

56. Which statement best describes list comprehensions in Python Programming? (variation 90)

57. Which statement best describes list comprehensions in Python Programming?

58. Which option is a correct use case for classes in Python Programming? (variation 93)

59. Which option is a correct use case for decorators in Python Programming? (variation 98)

60. A student says 'exceptions' is not relevant to real projects. What is the best correction?
