

CBSE Previous Year Practice 2018 (2018)

Subject: General | Topic: Python Programming

1. What is the most accurate beginner-level explanation of iterators? (variation 87)
2. Which option is a correct use case for classes in Python Programming? (variation 353)
3. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
4. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
5. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
6. Which option is a correct use case for decorators in Python Programming? (variation 108)
7. Which option is a correct use case for decorators in Python Programming? (variation 98)
8. Which statement best describes list comprehensions in Python Programming? (variation 90)
9. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
10. Which statement best describes list comprehensions in Python Programming?
11. Which option is a correct use case for decorators in Python Programming? (variation 78)
12. Which option is a correct use case for classes in Python Programming? (variation 103)
13. What is the most accurate beginner-level explanation of iterators?
14. Which option is a correct use case for classes in Python Programming? (variation 83)
15. Which statement best describes list comprehensions in Python Programming? (variation 100)
16. When working with Python Programming, why would a developer use dictionaries? (variation 71)
17. When working with Python Programming, why would a developer use dictionaries? (variation 101)

18. When working with Python Programming, why would a developer use dictionaries? (variation 351)
19. What is the most accurate beginner-level explanation of function parameters? (variation 82)
20. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
21. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
22. When working with Python Programming, why would a developer use dictionaries? (variation 91)
23. When working with Python Programming, why would a developer use virtual environments? (variation 86)
24. When working with Python Programming, why would a developer use dictionaries?
25. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
26. Which statement best describes list comprehensions in Python Programming? (variation 80)
27. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
28. When working with Python Programming, why would a developer use virtual environments? (variation 106)
29. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
30. Which statement best describes modules in Python Programming? (variation 105)
31. What is the most accurate beginner-level explanation of function parameters? (variation 102)
32. When working with Python Programming, why would a developer use virtual environments?
33. What is the most accurate beginner-level explanation of iterators? (variation 107)
34. When working with Python Programming, why would a developer use virtual environments? (variation 356)
35. Which statement best describes modules in Python Programming? (variation 75)
36. Which statement best describes modules in Python Programming? (variation 85)

37. When working with Python Programming, why would a developer use virtual environments? (variation 76)
38. Which option is a correct use case for decorators in Python Programming? (variation 358)
39. Which statement best describes modules in Python Programming? (variation 95)
40. Which option is a correct use case for classes in Python Programming? (variation 73)
41. Which option is a correct use case for classes in Python Programming? (variation 93)
42. What is the most accurate beginner-level explanation of function parameters? (variation 92)
43. A student says 'exceptions' is not relevant to real projects. What is the best correction?
44. When working with Python Programming, why would a developer use dictionaries? (variation 81)
45. Which statement best describes modules in Python Programming?
46. Which statement best describes list comprehensions in Python Programming? (variation 350)
47. What is the most accurate beginner-level explanation of function parameters? (variation 72)
48. Which statement best describes list comprehensions in Python Programming? (variation 70)
49. Which statement best describes modules in Python Programming? (variation 355)
50. What is the most accurate beginner-level explanation of iterators? (variation 97)
51. What is the most accurate beginner-level explanation of function parameters? (variation 352)
52. A student says 'file handling' is not relevant to real projects. What is the best correction?
53. When working with Python Programming, why would a developer use virtual environments? (variation 96)
54. Which option is a correct use case for classes in Python Programming?
55. What is the most accurate beginner-level explanation of function parameters?

56. What is the most accurate beginner-level explanation of iterators? (variation 357)

57. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)

58. What is the most accurate beginner-level explanation of iterators? (variation 77)

59. Which option is a correct use case for decorators in Python Programming?

60. Which option is a correct use case for decorators in Python Programming? (variation 88)
