

CBSE Previous Year Practice 2019 (2019)

Subject: General | Topic: Python Programming

1. What is the most accurate beginner-level explanation of function parameters?
2. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
3. What is the most accurate beginner-level explanation of function parameters? (variation 352)
4. Which statement best describes list comprehensions in Python Programming? (variation 80)
5. Which option is a correct use case for decorators in Python Programming?
6. Which option is a correct use case for decorators in Python Programming? (variation 108)
7. What is the most accurate beginner-level explanation of function parameters? (variation 102)
8. When working with Python Programming, why would a developer use dictionaries? (variation 81)
9. Which statement best describes modules in Python Programming? (variation 355)
10. When working with Python Programming, why would a developer use dictionaries? (variation 91)
11. When working with Python Programming, why would a developer use virtual environments? (variation 76)
12. Which statement best describes list comprehensions in Python Programming? (variation 90)
13. Which option is a correct use case for classes in Python Programming? (variation 353)
14. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
15. What is the most accurate beginner-level explanation of function parameters? (variation 92)
16. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
17. Which option is a correct use case for decorators in Python Programming? (variation 98)

18. A student says 'exceptions' is not relevant to real projects. What is the best correction?
19. What is the most accurate beginner-level explanation of iterators? (variation 107)
20. When working with Python Programming, why would a developer use virtual environments?
21. Which option is a correct use case for decorators in Python Programming? (variation 78)
22. When working with Python Programming, why would a developer use virtual environments? (variation 96)
23. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
24. Which option is a correct use case for classes in Python Programming? (variation 93)
25. When working with Python Programming, why would a developer use dictionaries? (variation 351)
26. When working with Python Programming, why would a developer use virtual environments? (variation 86)
27. Which option is a correct use case for classes in Python Programming? (variation 83)
28. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
29. Which statement best describes modules in Python Programming? (variation 105)
30. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
31. What is the most accurate beginner-level explanation of iterators? (variation 97)
32. Which statement best describes list comprehensions in Python Programming? (variation 70)
33. A student says 'file handling' is not relevant to real projects. What is the best correction?
34. When working with Python Programming, why would a developer use dictionaries? (variation 71)
35. What is the most accurate beginner-level explanation of function parameters? (variation 72)
36. Which option is a correct use case for classes in Python Programming?

37. Which statement best describes list comprehensions in Python Programming? (variation 100)
38. When working with Python Programming, why would a developer use dictionaries?
39. Which option is a correct use case for classes in Python Programming? (variation 103)
40. Which statement best describes list comprehensions in Python Programming? (variation 350)
41. When working with Python Programming, why would a developer use virtual environments? (variation 356)
42. Which statement best describes modules in Python Programming? (variation 75)
43. Which statement best describes modules in Python Programming? (variation 85)
44. Which statement best describes modules in Python Programming?
45. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
46. Which statement best describes list comprehensions in Python Programming?
47. Which statement best describes modules in Python Programming? (variation 95)
48. Which option is a correct use case for decorators in Python Programming? (variation 358)
49. What is the most accurate beginner-level explanation of iterators? (variation 77)
50. Which option is a correct use case for decorators in Python Programming? (variation 88)
51. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
52. When working with Python Programming, why would a developer use dictionaries? (variation 101)
53. What is the most accurate beginner-level explanation of function parameters? (variation 82)
54. What is the most accurate beginner-level explanation of iterators?
55. What is the most accurate beginner-level explanation of iterators? (variation 357)

56. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)

57. What is the most accurate beginner-level explanation of iterators? (variation 87)

58. Which option is a correct use case for classes in Python Programming? (variation 73)

59. When working with Python Programming, why would a developer use virtual environments? (variation 106)

60. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
