

CBSE Previous Year Practice 2020 (2020)

Subject: General | Topic: Python Programming

1. When working with Python Programming, why would a developer use virtual environments?
2. When working with Python Programming, why would a developer use virtual environments? (variation 86)
3. What is the most accurate beginner-level explanation of function parameters?
4. Which option is a correct use case for decorators in Python Programming? (variation 98)
5. Which statement best describes list comprehensions in Python Programming? (variation 80)
6. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
7. What is the most accurate beginner-level explanation of function parameters? (variation 352)
8. When working with Python Programming, why would a developer use dictionaries? (variation 351)
9. When working with Python Programming, why would a developer use virtual environments? (variation 96)
10. Which option is a correct use case for decorators in Python Programming? (variation 78)
11. Which statement best describes list comprehensions in Python Programming? (variation 90)
12. Which statement best describes modules in Python Programming?
13. Which option is a correct use case for decorators in Python Programming? (variation 358)
14. When working with Python Programming, why would a developer use dictionaries? (variation 71)
15. A student says 'exceptions' is not relevant to real projects. What is the best correction?
16. What is the most accurate beginner-level explanation of iterators? (variation 87)
17. Which option is a correct use case for decorators in Python Programming? (variation 108)

18. Which statement best describes modules in Python Programming? (variation 85)
19. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
20. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
21. What is the most accurate beginner-level explanation of iterators? (variation 77)
22. What is the most accurate beginner-level explanation of iterators? (variation 107)
23. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
24. Which statement best describes list comprehensions in Python Programming? (variation 70)
25. When working with Python Programming, why would a developer use dictionaries?
26. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
27. When working with Python Programming, why would a developer use dictionaries? (variation 91)
28. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
29. Which option is a correct use case for classes in Python Programming? (variation 353)
30. Which statement best describes modules in Python Programming? (variation 105)
31. Which option is a correct use case for classes in Python Programming? (variation 103)
32. Which option is a correct use case for classes in Python Programming? (variation 83)
33. Which statement best describes list comprehensions in Python Programming?
34. What is the most accurate beginner-level explanation of iterators? (variation 357)
35. When working with Python Programming, why would a developer use virtual environments? (variation 106)
36. When working with Python Programming, why would a developer use dictionaries? (variation 101)

37. When working with Python Programming, why would a developer use virtual environments? (variation 356)
38. A student says 'file handling' is not relevant to real projects. What is the best correction?
39. Which option is a correct use case for classes in Python Programming? (variation 93)
40. Which statement best describes modules in Python Programming? (variation 95)
41. What is the most accurate beginner-level explanation of function parameters? (variation 72)
42. Which option is a correct use case for classes in Python Programming?
43. Which option is a correct use case for decorators in Python Programming? (variation 88)
44. Which statement best describes list comprehensions in Python Programming? (variation 100)
45. Which option is a correct use case for classes in Python Programming? (variation 73)
46. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
47. Which statement best describes modules in Python Programming? (variation 75)
48. What is the most accurate beginner-level explanation of iterators? (variation 97)
49. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
50. What is the most accurate beginner-level explanation of function parameters? (variation 102)
51. What is the most accurate beginner-level explanation of function parameters? (variation 92)
52. What is the most accurate beginner-level explanation of iterators?
53. Which option is a correct use case for decorators in Python Programming?
54. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
55. What is the most accurate beginner-level explanation of function parameters? (variation 82)

56. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)

57. Which statement best describes modules in Python Programming? (variation 355)

58. When working with Python Programming, why would a developer use virtual environments? (variation 76)

59. Which statement best describes list comprehensions in Python Programming? (variation 350)

60. When working with Python Programming, why would a developer use dictionaries? (variation 81)
