

CBSE Previous Year Practice 2022 (2022)

Subject: General | Topic: Python Programming

1. Which statement best describes list comprehensions in Python Programming? (variation 350)
2. When working with Python Programming, why would a developer use dictionaries? (variation 351)
3. Which statement best describes modules in Python Programming? (variation 85)
4. A student says 'exceptions' is not relevant to real projects. What is the best correction?
5. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
6. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
7. What is the most accurate beginner-level explanation of function parameters? (variation 352)
8. Which option is a correct use case for classes in Python Programming? (variation 103)
9. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
10. What is the most accurate beginner-level explanation of function parameters? (variation 72)
11. When working with Python Programming, why would a developer use virtual environments? (variation 96)
12. When working with Python Programming, why would a developer use virtual environments?
13. What is the most accurate beginner-level explanation of iterators? (variation 107)
14. What is the most accurate beginner-level explanation of iterators?
15. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
16. Which option is a correct use case for decorators in Python Programming? (variation 78)
17. When working with Python Programming, why would a developer use dictionaries? (variation 71)

18. When working with Python Programming, why would a developer use dictionaries? (variation 81)
19. Which option is a correct use case for classes in Python Programming? (variation 83)
20. Which statement best describes list comprehensions in Python Programming? (variation 100)
21. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
22. Which option is a correct use case for classes in Python Programming? (variation 73)
23. Which statement best describes list comprehensions in Python Programming? (variation 70)
24. What is the most accurate beginner-level explanation of iterators? (variation 97)
25. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
26. Which option is a correct use case for decorators in Python Programming? (variation 108)
27. What is the most accurate beginner-level explanation of function parameters? (variation 102)
28. When working with Python Programming, why would a developer use dictionaries?
29. What is the most accurate beginner-level explanation of function parameters?
30. When working with Python Programming, why would a developer use dictionaries? (variation 101)
31. Which statement best describes modules in Python Programming? (variation 75)
32. Which option is a correct use case for decorators in Python Programming? (variation 358)
33. When working with Python Programming, why would a developer use virtual environments? (variation 106)
34. Which statement best describes modules in Python Programming?
35. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
36. When working with Python Programming, why would a developer use dictionaries? (variation 91)

37. Which statement best describes modules in Python Programming? (variation 355)
38. What is the most accurate beginner-level explanation of function parameters? (variation 82)
39. Which option is a correct use case for decorators in Python Programming? (variation 98)
40. Which statement best describes modules in Python Programming? (variation 105)
41. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
42. Which statement best describes list comprehensions in Python Programming? (variation 80)
43. What is the most accurate beginner-level explanation of iterators? (variation 357)
44. Which option is a correct use case for classes in Python Programming? (variation 93)
45. What is the most accurate beginner-level explanation of function parameters? (variation 92)
46. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
47. Which option is a correct use case for decorators in Python Programming? (variation 88)
48. Which statement best describes list comprehensions in Python Programming? (variation 90)
49. Which option is a correct use case for classes in Python Programming? (variation 353)
50. Which statement best describes modules in Python Programming? (variation 95)
51. What is the most accurate beginner-level explanation of iterators? (variation 77)
52. Which option is a correct use case for decorators in Python Programming?
53. A student says 'file handling' is not relevant to real projects. What is the best correction?
54. Which statement best describes list comprehensions in Python Programming?
55. When working with Python Programming, why would a developer use virtual environments? (variation 86)

56. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)

57. When working with Python Programming, why would a developer use virtual environments? (variation 76)

58. Which option is a correct use case for classes in Python Programming?

59. When working with Python Programming, why would a developer use virtual environments? (variation 356)

60. What is the most accurate beginner-level explanation of iterators? (variation 87)
