

CBSE Previous Year Practice 2025 (2025)

Subject: General | Topic: Python Programming

1. Which option is a correct use case for decorators in Python Programming? (variation 98)
2. When working with Python Programming, why would a developer use virtual environments? (variation 76)
3. What is the most accurate beginner-level explanation of function parameters?
4. Which option is a correct use case for classes in Python Programming? (variation 353)
5. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
6. Which statement best describes modules in Python Programming? (variation 355)
7. When working with Python Programming, why would a developer use dictionaries? (variation 91)
8. What is the most accurate beginner-level explanation of function parameters? (variation 92)
9. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
10. What is the most accurate beginner-level explanation of function parameters? (variation 102)
11. A student says 'exceptions' is not relevant to real projects. What is the best correction?
12. Which statement best describes modules in Python Programming? (variation 95)
13. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
14. What is the most accurate beginner-level explanation of function parameters? (variation 82)
15. When working with Python Programming, why would a developer use virtual environments? (variation 106)
16. Which statement best describes modules in Python Programming? (variation 85)
17. Which statement best describes list comprehensions in Python Programming? (variation 350)

18. When working with Python Programming, why would a developer use dictionaries?
19. When working with Python Programming, why would a developer use virtual environments? (variation 86)
20. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
21. Which option is a correct use case for classes in Python Programming? (variation 93)
22. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
23. What is the most accurate beginner-level explanation of function parameters? (variation 72)
24. Which statement best describes modules in Python Programming? (variation 75)
25. Which statement best describes list comprehensions in Python Programming? (variation 80)
26. Which option is a correct use case for decorators in Python Programming? (variation 108)
27. Which statement best describes list comprehensions in Python Programming? (variation 90)
28. Which option is a correct use case for decorators in Python Programming? (variation 88)
29. What is the most accurate beginner-level explanation of iterators? (variation 87)
30. What is the most accurate beginner-level explanation of iterators? (variation 357)
31. Which statement best describes list comprehensions in Python Programming? (variation 70)
32. Which option is a correct use case for classes in Python Programming?
33. Which statement best describes modules in Python Programming? (variation 105)
34. What is the most accurate beginner-level explanation of iterators? (variation 77)
35. Which option is a correct use case for decorators in Python Programming? (variation 358)
36. Which option is a correct use case for classes in Python Programming? (variation 103)

37. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
38. What is the most accurate beginner-level explanation of iterators?
39. Which option is a correct use case for classes in Python Programming? (variation 73)
40. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
41. When working with Python Programming, why would a developer use virtual environments? (variation 96)
42. Which statement best describes list comprehensions in Python Programming? (variation 100)
43. Which statement best describes list comprehensions in Python Programming?
44. What is the most accurate beginner-level explanation of iterators? (variation 107)
45. When working with Python Programming, why would a developer use dictionaries? (variation 71)
46. Which option is a correct use case for decorators in Python Programming? (variation 78)
47. What is the most accurate beginner-level explanation of function parameters? (variation 352)
48. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
49. When working with Python Programming, why would a developer use dictionaries? (variation 351)
50. Which option is a correct use case for classes in Python Programming? (variation 83)
51. What is the most accurate beginner-level explanation of iterators? (variation 97)
52. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
53. Which statement best describes modules in Python Programming?
54. When working with Python Programming, why would a developer use dictionaries? (variation 101)
55. When working with Python Programming, why would a developer use virtual environments? (variation 356)

56. Which option is a correct use case for decorators in Python Programming?
57. A student says 'file handling' is not relevant to real projects. What is the best correction?
58. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
59. When working with Python Programming, why would a developer use dictionaries? (variation 81)
60. When working with Python Programming, why would a developer use virtual environments?
