

ICSE Previous Year Practice 2017 (2017)

Subject: General | Topic: Python Programming

1. What is the most accurate beginner-level explanation of function parameters? (variation 352)
2. Which option is a correct use case for decorators in Python Programming? (variation 88)
3. Which statement best describes list comprehensions in Python Programming? (variation 80)
4. When working with Python Programming, why would a developer use dictionaries? (variation 351)
5. What is the most accurate beginner-level explanation of function parameters? (variation 102)
6. Which statement best describes list comprehensions in Python Programming? (variation 100)
7. When working with Python Programming, why would a developer use virtual environments? (variation 86)
8. When working with Python Programming, why would a developer use virtual environments? (variation 96)
9. Which statement best describes list comprehensions in Python Programming? (variation 70)
10. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
11. Which option is a correct use case for classes in Python Programming? (variation 83)
12. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
13. When working with Python Programming, why would a developer use dictionaries?
14. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
15. When working with Python Programming, why would a developer use virtual environments?
16. Which statement best describes list comprehensions in Python Programming? (variation 350)
17. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)

18. Which option is a correct use case for decorators in Python Programming? (variation 78)
19. When working with Python Programming, why would a developer use virtual environments? (variation 356)
20. Which option is a correct use case for classes in Python Programming? (variation 353)
21. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
22. Which option is a correct use case for decorators in Python Programming? (variation 108)
23. What is the most accurate beginner-level explanation of iterators? (variation 97)
24. What is the most accurate beginner-level explanation of function parameters? (variation 82)
25. Which option is a correct use case for classes in Python Programming? (variation 93)
26. Which statement best describes modules in Python Programming? (variation 105)
27. What is the most accurate beginner-level explanation of iterators?
28. Which statement best describes modules in Python Programming? (variation 355)
29. What is the most accurate beginner-level explanation of function parameters? (variation 92)
30. What is the most accurate beginner-level explanation of function parameters?
31. Which statement best describes modules in Python Programming? (variation 95)
32. When working with Python Programming, why would a developer use virtual environments? (variation 106)
33. Which statement best describes modules in Python Programming? (variation 85)
34. A student says 'exceptions' is not relevant to real projects. What is the best correction?
35. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
36. When working with Python Programming, why would a developer use dictionaries? (variation 81)

37. Which statement best describes list comprehensions in Python Programming?
38. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
39. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
40. Which statement best describes modules in Python Programming?
41. What is the most accurate beginner-level explanation of iterators? (variation 357)
42. What is the most accurate beginner-level explanation of function parameters? (variation 72)
43. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
44. Which statement best describes list comprehensions in Python Programming? (variation 90)
45. Which option is a correct use case for decorators in Python Programming? (variation 98)
46. What is the most accurate beginner-level explanation of iterators? (variation 87)
47. When working with Python Programming, why would a developer use dictionaries? (variation 91)
48. When working with Python Programming, why would a developer use dictionaries? (variation 71)
49. When working with Python Programming, why would a developer use virtual environments? (variation 76)
50. What is the most accurate beginner-level explanation of iterators? (variation 77)
51. Which option is a correct use case for decorators in Python Programming?
52. Which option is a correct use case for classes in Python Programming? (variation 73)
53. Which option is a correct use case for decorators in Python Programming? (variation 358)
54. Which option is a correct use case for classes in Python Programming? (variation 103)
55. Which statement best describes modules in Python Programming? (variation 75)

56. What is the most accurate beginner-level explanation of iterators? (variation 107)
57. A student says 'file handling' is not relevant to real projects. What is the best correction?
58. Which option is a correct use case for classes in Python Programming?
59. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
60. When working with Python Programming, why would a developer use dictionaries? (variation 101)
