

ICSE Previous Year Practice 2018 (2018)

Subject: General | Topic: Python Programming

1. Which statement best describes modules in Python Programming? (variation 105)
2. What is the most accurate beginner-level explanation of iterators? (variation 87)
3. Which statement best describes list comprehensions in Python Programming? (variation 90)
4. A student says 'exceptions' is not relevant to real projects. What is the best correction?
5. What is the most accurate beginner-level explanation of iterators?
6. Which option is a correct use case for classes in Python Programming? (variation 83)
7. What is the most accurate beginner-level explanation of function parameters?
8. What is the most accurate beginner-level explanation of function parameters? (variation 92)
9. What is the most accurate beginner-level explanation of function parameters? (variation 72)
10. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
11. Which option is a correct use case for decorators in Python Programming? (variation 78)
12. Which option is a correct use case for decorators in Python Programming?
13. What is the most accurate beginner-level explanation of function parameters? (variation 102)
14. When working with Python Programming, why would a developer use virtual environments? (variation 86)
15. When working with Python Programming, why would a developer use dictionaries? (variation 101)
16. A student says 'file handling' is not relevant to real projects. What is the best correction?
17. What is the most accurate beginner-level explanation of iterators? (variation 107)

18. Which statement best describes list comprehensions in Python Programming? (variation 70)
19. Which statement best describes list comprehensions in Python Programming?
20. When working with Python Programming, why would a developer use dictionaries?
21. Which statement best describes list comprehensions in Python Programming? (variation 80)
22. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
23. Which option is a correct use case for classes in Python Programming?
24. Which statement best describes list comprehensions in Python Programming? (variation 350)
25. When working with Python Programming, why would a developer use virtual environments? (variation 96)
26. Which option is a correct use case for decorators in Python Programming? (variation 88)
27. Which statement best describes modules in Python Programming? (variation 85)
28. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
29. What is the most accurate beginner-level explanation of function parameters? (variation 82)
30. When working with Python Programming, why would a developer use virtual environments? (variation 106)
31. Which option is a correct use case for decorators in Python Programming? (variation 358)
32. Which option is a correct use case for classes in Python Programming? (variation 73)
33. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
34. When working with Python Programming, why would a developer use virtual environments? (variation 356)
35. When working with Python Programming, why would a developer use dictionaries? (variation 81)
36. Which statement best describes list comprehensions in Python Programming? (variation 100)

37. When working with Python Programming, why would a developer use dictionaries? (variation 91)
38. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
39. Which option is a correct use case for classes in Python Programming? (variation 103)
40. What is the most accurate beginner-level explanation of iterators? (variation 357)
41. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
42. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
43. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
44. Which statement best describes modules in Python Programming? (variation 75)
45. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
46. When working with Python Programming, why would a developer use dictionaries? (variation 71)
47. Which statement best describes modules in Python Programming?
48. What is the most accurate beginner-level explanation of function parameters? (variation 352)
49. Which option is a correct use case for classes in Python Programming? (variation 353)
50. What is the most accurate beginner-level explanation of iterators? (variation 77)
51. Which statement best describes modules in Python Programming? (variation 355)
52. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
53. When working with Python Programming, why would a developer use virtual environments?
54. When working with Python Programming, why would a developer use virtual environments? (variation 76)
55. Which option is a correct use case for classes in Python Programming? (variation 93)

56. Which option is a correct use case for decorators in Python Programming? (variation 98)

57. Which statement best describes modules in Python Programming? (variation 95)

58. When working with Python Programming, why would a developer use dictionaries? (variation 351)

59. What is the most accurate beginner-level explanation of iterators? (variation 97)

60. Which option is a correct use case for decorators in Python Programming? (variation 108)
