

ICSE Previous Year Practice 2019 (2019)

Subject: General | Topic: Python Programming

1. Which option is a correct use case for decorators in Python Programming? (variation 78)
2. Which statement best describes list comprehensions in Python Programming? (variation 350)
3. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
4. A student says 'exceptions' is not relevant to real projects. What is the best correction?
5. Which statement best describes list comprehensions in Python Programming? (variation 80)
6. When working with Python Programming, why would a developer use dictionaries? (variation 101)
7. A student says 'file handling' is not relevant to real projects. What is the best correction?
8. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
9. Which statement best describes list comprehensions in Python Programming? (variation 70)
10. Which option is a correct use case for classes in Python Programming? (variation 73)
11. Which statement best describes modules in Python Programming? (variation 105)
12. Which option is a correct use case for classes in Python Programming?
13. What is the most accurate beginner-level explanation of function parameters? (variation 102)
14. When working with Python Programming, why would a developer use dictionaries? (variation 91)
15. What is the most accurate beginner-level explanation of iterators? (variation 87)
16. When working with Python Programming, why would a developer use dictionaries? (variation 81)
17. When working with Python Programming, why would a developer use dictionaries? (variation 71)

18. What is the most accurate beginner-level explanation of function parameters? (variation 72)
19. Which statement best describes list comprehensions in Python Programming?
20. What is the most accurate beginner-level explanation of function parameters?
21. What is the most accurate beginner-level explanation of iterators? (variation 107)
22. Which statement best describes modules in Python Programming? (variation 95)
23. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
24. What is the most accurate beginner-level explanation of function parameters? (variation 82)
25. What is the most accurate beginner-level explanation of iterators? (variation 77)
26. What is the most accurate beginner-level explanation of function parameters? (variation 352)
27. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
28. When working with Python Programming, why would a developer use virtual environments? (variation 106)
29. Which statement best describes list comprehensions in Python Programming? (variation 90)
30. Which statement best describes modules in Python Programming? (variation 75)
31. Which option is a correct use case for classes in Python Programming? (variation 353)
32. Which statement best describes modules in Python Programming?
33. Which statement best describes modules in Python Programming? (variation 355)
34. Which option is a correct use case for decorators in Python Programming? (variation 108)
35. Which statement best describes modules in Python Programming? (variation 85)
36. Which option is a correct use case for classes in Python Programming? (variation 103)

37. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
38. When working with Python Programming, why would a developer use dictionaries? (variation 351)
39. What is the most accurate beginner-level explanation of iterators? (variation 97)
40. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
41. When working with Python Programming, why would a developer use virtual environments? (variation 356)
42. Which option is a correct use case for decorators in Python Programming? (variation 88)
43. Which statement best describes list comprehensions in Python Programming? (variation 100)
44. Which option is a correct use case for classes in Python Programming? (variation 93)
45. When working with Python Programming, why would a developer use virtual environments? (variation 86)
46. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
47. What is the most accurate beginner-level explanation of function parameters? (variation 92)
48. Which option is a correct use case for decorators in Python Programming? (variation 358)
49. When working with Python Programming, why would a developer use virtual environments? (variation 76)
50. What is the most accurate beginner-level explanation of iterators?
51. Which option is a correct use case for decorators in Python Programming?
52. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
53. When working with Python Programming, why would a developer use virtual environments?
54. Which option is a correct use case for decorators in Python Programming? (variation 98)
55. Which option is a correct use case for classes in Python Programming? (variation 83)

56. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)

57. When working with Python Programming, why would a developer use dictionaries?

58. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)

59. What is the most accurate beginner-level explanation of iterators? (variation 357)

60. When working with Python Programming, why would a developer use virtual environments? (variation 96)
