

ICSE Previous Year Practice 2020 (2020)

Subject: General | Topic: Python Programming

1. Which statement best describes modules in Python Programming? (variation 75)
2. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
3. Which option is a correct use case for decorators in Python Programming? (variation 78)
4. What is the most accurate beginner-level explanation of function parameters? (variation 352)
5. Which option is a correct use case for classes in Python Programming? (variation 353)
6. Which statement best describes modules in Python Programming? (variation 105)
7. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
8. When working with Python Programming, why would a developer use virtual environments? (variation 86)
9. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
10. When working with Python Programming, why would a developer use virtual environments?
11. Which option is a correct use case for decorators in Python Programming?
12. When working with Python Programming, why would a developer use virtual environments? (variation 76)
13. What is the most accurate beginner-level explanation of iterators? (variation 97)
14. What is the most accurate beginner-level explanation of iterators? (variation 107)
15. Which option is a correct use case for classes in Python Programming? (variation 83)
16. When working with Python Programming, why would a developer use dictionaries? (variation 71)
17. Which statement best describes list comprehensions in Python Programming?

18. What is the most accurate beginner-level explanation of function parameters? (variation 72)
19. What is the most accurate beginner-level explanation of function parameters? (variation 102)
20. What is the most accurate beginner-level explanation of function parameters? (variation 82)
21. When working with Python Programming, why would a developer use dictionaries? (variation 81)
22. Which option is a correct use case for classes in Python Programming? (variation 93)
23. When working with Python Programming, why would a developer use dictionaries? (variation 91)
24. What is the most accurate beginner-level explanation of function parameters?
25. When working with Python Programming, why would a developer use dictionaries?
26. What is the most accurate beginner-level explanation of iterators? (variation 357)
27. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
28. Which statement best describes list comprehensions in Python Programming? (variation 80)
29. Which statement best describes list comprehensions in Python Programming? (variation 70)
30. Which option is a correct use case for decorators in Python Programming? (variation 358)
31. What is the most accurate beginner-level explanation of iterators?
32. Which option is a correct use case for decorators in Python Programming? (variation 88)
33. When working with Python Programming, why would a developer use virtual environments? (variation 356)
34. Which statement best describes list comprehensions in Python Programming? (variation 90)
35. When working with Python Programming, why would a developer use virtual environments? (variation 106)
36. Which statement best describes modules in Python Programming? (variation 355)

37. Which statement best describes list comprehensions in Python Programming? (variation 100)
38. Which statement best describes list comprehensions in Python Programming? (variation 350)
39. A student says 'file handling' is not relevant to real projects. What is the best correction?
40. Which option is a correct use case for decorators in Python Programming? (variation 98)
41. When working with Python Programming, why would a developer use dictionaries? (variation 101)
42. Which statement best describes modules in Python Programming?
43. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
44. Which option is a correct use case for decorators in Python Programming? (variation 108)
45. What is the most accurate beginner-level explanation of iterators? (variation 87)
46. When working with Python Programming, why would a developer use virtual environments? (variation 96)
47. Which option is a correct use case for classes in Python Programming? (variation 103)
48. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
49. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
50. A student says 'exceptions' is not relevant to real projects. What is the best correction?
51. When working with Python Programming, why would a developer use dictionaries? (variation 351)
52. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
53. Which statement best describes modules in Python Programming? (variation 85)
54. What is the most accurate beginner-level explanation of function parameters? (variation 92)
55. Which option is a correct use case for classes in Python Programming?

56. What is the most accurate beginner-level explanation of iterators? (variation 77)

57. Which statement best describes modules in Python Programming? (variation 95)

58. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)

59. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)

60. Which option is a correct use case for classes in Python Programming? (variation 73)
