

ICSE Previous Year Practice 2021 (2021)

Subject: General | Topic: Python Programming

1. Which statement best describes list comprehensions in Python Programming?
2. Which option is a correct use case for decorators in Python Programming?
3. Which option is a correct use case for decorators in Python Programming? (variation 358)
4. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
5. When working with Python Programming, why would a developer use virtual environments? (variation 76)
6. Which option is a correct use case for classes in Python Programming? (variation 353)
7. Which option is a correct use case for decorators in Python Programming? (variation 78)
8. What is the most accurate beginner-level explanation of function parameters? (variation 352)
9. Which option is a correct use case for classes in Python Programming? (variation 83)
10. When working with Python Programming, why would a developer use virtual environments? (variation 106)
11. A student says 'exceptions' is not relevant to real projects. What is the best correction?
12. Which option is a correct use case for decorators in Python Programming? (variation 88)
13. Which statement best describes modules in Python Programming?
14. What is the most accurate beginner-level explanation of iterators? (variation 77)
15. What is the most accurate beginner-level explanation of iterators? (variation 357)
16. What is the most accurate beginner-level explanation of function parameters?
17. Which statement best describes modules in Python Programming? (variation 355)

18. When working with Python Programming, why would a developer use dictionaries? (variation 91)
19. Which statement best describes list comprehensions in Python Programming? (variation 90)
20. What is the most accurate beginner-level explanation of iterators? (variation 97)
21. When working with Python Programming, why would a developer use virtual environments? (variation 86)
22. When working with Python Programming, why would a developer use virtual environments?
23. Which statement best describes modules in Python Programming? (variation 105)
24. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
25. When working with Python Programming, why would a developer use dictionaries?
26. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
27. Which statement best describes modules in Python Programming? (variation 95)
28. Which option is a correct use case for decorators in Python Programming? (variation 108)
29. When working with Python Programming, why would a developer use dictionaries? (variation 101)
30. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
31. What is the most accurate beginner-level explanation of iterators?
32. What is the most accurate beginner-level explanation of function parameters? (variation 72)
33. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
34. What is the most accurate beginner-level explanation of iterators? (variation 87)
35. What is the most accurate beginner-level explanation of function parameters? (variation 92)
36. Which option is a correct use case for classes in Python Programming? (variation 103)

37. Which statement best describes list comprehensions in Python Programming? (variation 100)
38. When working with Python Programming, why would a developer use virtual environments? (variation 356)
39. A student says 'file handling' is not relevant to real projects. What is the best correction?
40. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
41. What is the most accurate beginner-level explanation of iterators? (variation 107)
42. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
43. Which statement best describes list comprehensions in Python Programming? (variation 70)
44. When working with Python Programming, why would a developer use virtual environments? (variation 96)
45. Which option is a correct use case for decorators in Python Programming? (variation 98)
46. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
47. When working with Python Programming, why would a developer use dictionaries? (variation 71)
48. When working with Python Programming, why would a developer use dictionaries? (variation 351)
49. Which option is a correct use case for classes in Python Programming? (variation 93)
50. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
51. Which option is a correct use case for classes in Python Programming?
52. Which option is a correct use case for classes in Python Programming? (variation 73)
53. Which statement best describes list comprehensions in Python Programming? (variation 350)
54. Which statement best describes list comprehensions in Python Programming? (variation 80)
55. Which statement best describes modules in Python Programming? (variation 75)

56. When working with Python Programming, why would a developer use dictionaries? (variation 81)

57. What is the most accurate beginner-level explanation of function parameters? (variation 82)

58. Which statement best describes modules in Python Programming? (variation 85)

59. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)

60. What is the most accurate beginner-level explanation of function parameters? (variation 102)
