

ICSE Previous Year Practice 2023 (2023)

Subject: General | Topic: Python Programming

1. What is the most accurate beginner-level explanation of function parameters? (variation 72)
2. When working with Python Programming, why would a developer use virtual environments?
3. When working with Python Programming, why would a developer use virtual environments? (variation 106)
4. Which statement best describes list comprehensions in Python Programming? (variation 80)
5. When working with Python Programming, why would a developer use virtual environments? (variation 96)
6. Which statement best describes list comprehensions in Python Programming? (variation 70)
7. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
8. Which statement best describes modules in Python Programming? (variation 85)
9. Which option is a correct use case for classes in Python Programming? (variation 73)
10. What is the most accurate beginner-level explanation of iterators?
11. What is the most accurate beginner-level explanation of iterators? (variation 97)
12. Which statement best describes list comprehensions in Python Programming? (variation 100)
13. Which option is a correct use case for decorators in Python Programming? (variation 108)
14. Which statement best describes modules in Python Programming? (variation 75)
15. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
16. What is the most accurate beginner-level explanation of function parameters?
17. What is the most accurate beginner-level explanation of iterators? (variation 77)

18. When working with Python Programming, why would a developer use dictionaries? (variation 91)
19. Which statement best describes modules in Python Programming? (variation 95)
20. Which statement best describes list comprehensions in Python Programming?
21. When working with Python Programming, why would a developer use virtual environments? (variation 76)
22. A student says 'exceptions' is not relevant to real projects. What is the best correction?
23. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
24. What is the most accurate beginner-level explanation of function parameters? (variation 352)
25. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
26. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
27. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
28. Which statement best describes list comprehensions in Python Programming? (variation 90)
29. Which option is a correct use case for decorators in Python Programming?
30. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
31. Which option is a correct use case for classes in Python Programming? (variation 93)
32. When working with Python Programming, why would a developer use dictionaries? (variation 101)
33. What is the most accurate beginner-level explanation of iterators? (variation 357)
34. When working with Python Programming, why would a developer use dictionaries? (variation 81)
35. When working with Python Programming, why would a developer use dictionaries?
36. Which option is a correct use case for decorators in Python Programming? (variation 358)

37. What is the most accurate beginner-level explanation of iterators? (variation 107)
38. Which statement best describes modules in Python Programming? (variation 355)
39. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
40. Which statement best describes modules in Python Programming?
41. Which option is a correct use case for classes in Python Programming? (variation 353)
42. Which statement best describes modules in Python Programming? (variation 105)
43. When working with Python Programming, why would a developer use dictionaries? (variation 351)
44. What is the most accurate beginner-level explanation of function parameters? (variation 82)
45. What is the most accurate beginner-level explanation of function parameters? (variation 92)
46. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
47. When working with Python Programming, why would a developer use dictionaries? (variation 71)
48. Which option is a correct use case for classes in Python Programming? (variation 83)
49. What is the most accurate beginner-level explanation of iterators? (variation 87)
50. What is the most accurate beginner-level explanation of function parameters? (variation 102)
51. Which option is a correct use case for classes in Python Programming? (variation 103)
52. Which option is a correct use case for classes in Python Programming?
53. Which option is a correct use case for decorators in Python Programming? (variation 88)
54. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
55. A student says 'file handling' is not relevant to real projects. What is the best correction?

56. Which option is a correct use case for decorators in Python Programming? (variation 98)

57. Which option is a correct use case for decorators in Python Programming? (variation 78)

58. When working with Python Programming, why would a developer use virtual environments? (variation 356)

59. Which statement best describes list comprehensions in Python Programming? (variation 350)

60. When working with Python Programming, why would a developer use virtual environments? (variation 86)
