

State Board Previous Year Practice 2017 (2017)

Subject: General | Topic: Python Programming

1. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
2. Which statement best describes modules in Python Programming? (variation 95)
3. Which option is a correct use case for classes in Python Programming? (variation 83)
4. Which statement best describes modules in Python Programming? (variation 355)
5. When working with Python Programming, why would a developer use dictionaries? (variation 101)
6. What is the most accurate beginner-level explanation of iterators? (variation 77)
7. Which option is a correct use case for decorators in Python Programming? (variation 78)
8. Which option is a correct use case for decorators in Python Programming? (variation 88)
9. Which statement best describes modules in Python Programming?
10. A student says 'exceptions' is not relevant to real projects. What is the best correction?
11. Which option is a correct use case for classes in Python Programming? (variation 353)
12. When working with Python Programming, why would a developer use virtual environments? (variation 76)
13. Which statement best describes list comprehensions in Python Programming? (variation 90)
14. Which option is a correct use case for classes in Python Programming?
15. When working with Python Programming, why would a developer use dictionaries?
16. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
17. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)

18. What is the most accurate beginner-level explanation of iterators? (variation 107)
19. What is the most accurate beginner-level explanation of iterators? (variation 87)
20. What is the most accurate beginner-level explanation of function parameters? (variation 92)
21. Which statement best describes list comprehensions in Python Programming?
22. Which option is a correct use case for decorators in Python Programming?
23. When working with Python Programming, why would a developer use dictionaries? (variation 81)
24. What is the most accurate beginner-level explanation of function parameters?
25. When working with Python Programming, why would a developer use virtual environments? (variation 86)
26. When working with Python Programming, why would a developer use virtual environments? (variation 106)
27. When working with Python Programming, why would a developer use dictionaries? (variation 91)
28. What is the most accurate beginner-level explanation of iterators? (variation 97)
29. Which statement best describes modules in Python Programming? (variation 105)
30. What is the most accurate beginner-level explanation of iterators? (variation 357)
31. Which option is a correct use case for classes in Python Programming? (variation 93)
32. A student says 'file handling' is not relevant to real projects. What is the best correction?
33. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
34. Which statement best describes list comprehensions in Python Programming? (variation 100)
35. Which statement best describes modules in Python Programming? (variation 75)
36. Which option is a correct use case for decorators in Python Programming? (variation 108)

37. Which statement best describes list comprehensions in Python Programming? (variation 70)
38. Which option is a correct use case for classes in Python Programming? (variation 73)
39. When working with Python Programming, why would a developer use virtual environments? (variation 96)
40. When working with Python Programming, why would a developer use dictionaries? (variation 71)
41. Which statement best describes list comprehensions in Python Programming? (variation 350)
42. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
43. What is the most accurate beginner-level explanation of iterators?
44. What is the most accurate beginner-level explanation of function parameters? (variation 102)
45. What is the most accurate beginner-level explanation of function parameters? (variation 72)
46. Which statement best describes modules in Python Programming? (variation 85)
47. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
48. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
49. Which option is a correct use case for classes in Python Programming? (variation 103)
50. What is the most accurate beginner-level explanation of function parameters? (variation 352)
51. Which option is a correct use case for decorators in Python Programming? (variation 98)
52. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
53. Which option is a correct use case for decorators in Python Programming? (variation 358)
54. What is the most accurate beginner-level explanation of function parameters? (variation 82)
55. Which statement best describes list comprehensions in Python Programming? (variation 80)

56. When working with Python Programming, why would a developer use virtual environments?
57. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
58. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
59. When working with Python Programming, why would a developer use dictionaries? (variation 351)
60. When working with Python Programming, why would a developer use virtual environments? (variation 356)
