

State Board Previous Year Practice 2018 (2018)

Subject: General | Topic: Python Programming

1. Which option is a correct use case for classes in Python Programming? (variation 83)
2. A student says 'exceptions' is not relevant to real projects. What is the best correction?
3. What is the most accurate beginner-level explanation of function parameters? (variation 102)
4. When working with Python Programming, why would a developer use virtual environments? (variation 106)
5. What is the most accurate beginner-level explanation of iterators? (variation 107)
6. When working with Python Programming, why would a developer use virtual environments? (variation 76)
7. What is the most accurate beginner-level explanation of iterators? (variation 357)
8. What is the most accurate beginner-level explanation of iterators? (variation 87)
9. When working with Python Programming, why would a developer use virtual environments? (variation 86)
10. Which option is a correct use case for decorators in Python Programming? (variation 108)
11. Which statement best describes list comprehensions in Python Programming? (variation 80)
12. Which option is a correct use case for classes in Python Programming? (variation 353)
13. Which option is a correct use case for decorators in Python Programming?
14. Which option is a correct use case for decorators in Python Programming? (variation 78)
15. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
16. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
17. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)

18. What is the most accurate beginner-level explanation of iterators?
19. A student says 'file handling' is not relevant to real projects. What is the best correction?
20. Which option is a correct use case for classes in Python Programming? (variation 93)
21. When working with Python Programming, why would a developer use virtual environments?
22. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
23. When working with Python Programming, why would a developer use dictionaries? (variation 81)
24. Which option is a correct use case for decorators in Python Programming? (variation 88)
25. Which option is a correct use case for decorators in Python Programming? (variation 98)
26. When working with Python Programming, why would a developer use dictionaries? (variation 71)
27. What is the most accurate beginner-level explanation of iterators? (variation 97)
28. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
29. When working with Python Programming, why would a developer use dictionaries? (variation 101)
30. Which statement best describes list comprehensions in Python Programming? (variation 100)
31. Which option is a correct use case for classes in Python Programming? (variation 103)
32. When working with Python Programming, why would a developer use virtual environments? (variation 96)
33. Which statement best describes modules in Python Programming? (variation 105)
34. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
35. Which statement best describes modules in Python Programming? (variation 95)
36. What is the most accurate beginner-level explanation of function parameters? (variation 82)

37. Which statement best describes modules in Python Programming? (variation 85)
38. When working with Python Programming, why would a developer use dictionaries? (variation 91)
39. Which statement best describes list comprehensions in Python Programming?
40. When working with Python Programming, why would a developer use dictionaries? (variation 351)
41. Which statement best describes modules in Python Programming? (variation 75)
42. Which statement best describes modules in Python Programming?
43. What is the most accurate beginner-level explanation of function parameters?
44. What is the most accurate beginner-level explanation of function parameters? (variation 72)
45. Which option is a correct use case for classes in Python Programming? (variation 73)
46. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
47. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
48. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
49. Which option is a correct use case for classes in Python Programming?
50. Which statement best describes modules in Python Programming? (variation 355)
51. When working with Python Programming, why would a developer use virtual environments? (variation 356)
52. Which statement best describes list comprehensions in Python Programming? (variation 70)
53. Which option is a correct use case for decorators in Python Programming? (variation 358)
54. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
55. Which statement best describes list comprehensions in Python Programming? (variation 90)

56. What is the most accurate beginner-level explanation of function parameters? (variation 92)

57. Which statement best describes list comprehensions in Python Programming? (variation 350)

58. When working with Python Programming, why would a developer use dictionaries?

59. What is the most accurate beginner-level explanation of function parameters? (variation 352)

60. What is the most accurate beginner-level explanation of iterators? (variation 77)
