

State Board Previous Year Practice 2019 (2019)

Subject: General | Topic: Python Programming

1. Which option is a correct use case for classes in Python Programming? (variation 73)
2. What is the most accurate beginner-level explanation of iterators? (variation 87)
3. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
4. Which statement best describes list comprehensions in Python Programming? (variation 70)
5. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
6. Which option is a correct use case for decorators in Python Programming? (variation 358)
7. What is the most accurate beginner-level explanation of function parameters?
8. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
9. When working with Python Programming, why would a developer use virtual environments? (variation 96)
10. Which option is a correct use case for classes in Python Programming?
11. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
12. Which option is a correct use case for classes in Python Programming? (variation 93)
13. When working with Python Programming, why would a developer use dictionaries? (variation 91)
14. When working with Python Programming, why would a developer use dictionaries?
15. What is the most accurate beginner-level explanation of iterators? (variation 77)
16. When working with Python Programming, why would a developer use dictionaries? (variation 351)
17. A student says 'exceptions' is not relevant to real projects. What is the best correction?

18. A student says 'file handling' is not relevant to real projects. What is the best correction?
19. Which statement best describes modules in Python Programming? (variation 355)
20. When working with Python Programming, why would a developer use dictionaries? (variation 101)
21. When working with Python Programming, why would a developer use virtual environments? (variation 76)
22. Which option is a correct use case for classes in Python Programming? (variation 83)
23. When working with Python Programming, why would a developer use dictionaries? (variation 71)
24. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
25. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
26. What is the most accurate beginner-level explanation of iterators?
27. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
28. Which statement best describes modules in Python Programming? (variation 75)
29. Which option is a correct use case for classes in Python Programming? (variation 353)
30. What is the most accurate beginner-level explanation of iterators? (variation 357)
31. When working with Python Programming, why would a developer use virtual environments?
32. Which option is a correct use case for decorators in Python Programming? (variation 78)
33. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
34. When working with Python Programming, why would a developer use dictionaries? (variation 81)
35. What is the most accurate beginner-level explanation of function parameters? (variation 102)
36. Which statement best describes list comprehensions in Python Programming? (variation 80)

37. What is the most accurate beginner-level explanation of function parameters? (variation 72)
38. Which statement best describes modules in Python Programming? (variation 95)
39. Which statement best describes list comprehensions in Python Programming? (variation 90)
40. Which statement best describes modules in Python Programming?
41. Which statement best describes modules in Python Programming? (variation 105)
42. What is the most accurate beginner-level explanation of function parameters? (variation 92)
43. When working with Python Programming, why would a developer use virtual environments? (variation 356)
44. Which option is a correct use case for decorators in Python Programming?
45. What is the most accurate beginner-level explanation of function parameters? (variation 352)
46. Which option is a correct use case for classes in Python Programming? (variation 103)
47. Which statement best describes list comprehensions in Python Programming? (variation 100)
48. What is the most accurate beginner-level explanation of iterators? (variation 107)
49. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
50. Which statement best describes list comprehensions in Python Programming?
51. Which option is a correct use case for decorators in Python Programming? (variation 88)
52. Which option is a correct use case for decorators in Python Programming? (variation 98)
53. Which statement best describes list comprehensions in Python Programming? (variation 350)
54. What is the most accurate beginner-level explanation of iterators? (variation 97)
55. When working with Python Programming, why would a developer use virtual environments? (variation 106)

56. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
57. What is the most accurate beginner-level explanation of function parameters? (variation 82)
58. Which statement best describes modules in Python Programming? (variation 85)
59. Which option is a correct use case for decorators in Python Programming? (variation 108)
60. When working with Python Programming, why would a developer use virtual environments? (variation 86)
