

State Board Previous Year Practice 2020 (2020)

Subject: General | Topic: Python Programming

1. Which option is a correct use case for classes in Python Programming? (variation 83)
2. Which statement best describes modules in Python Programming? (variation 105)
3. When working with Python Programming, why would a developer use virtual environments?
4. Which statement best describes modules in Python Programming? (variation 85)
5. What is the most accurate beginner-level explanation of function parameters? (variation 72)
6. When working with Python Programming, why would a developer use dictionaries?
7. Which option is a correct use case for decorators in Python Programming? (variation 108)
8. Which statement best describes modules in Python Programming? (variation 75)
9. Which statement best describes list comprehensions in Python Programming? (variation 90)
10. Which statement best describes list comprehensions in Python Programming? (variation 350)
11. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
12. When working with Python Programming, why would a developer use dictionaries? (variation 101)
13. What is the most accurate beginner-level explanation of function parameters? (variation 92)
14. When working with Python Programming, why would a developer use dictionaries? (variation 351)
15. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
16. When working with Python Programming, why would a developer use dictionaries? (variation 91)
17. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)

18. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
19. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
20. Which statement best describes modules in Python Programming? (variation 355)
21. Which statement best describes list comprehensions in Python Programming? (variation 70)
22. Which statement best describes list comprehensions in Python Programming?
23. Which option is a correct use case for classes in Python Programming? (variation 93)
24. Which option is a correct use case for classes in Python Programming? (variation 103)
25. What is the most accurate beginner-level explanation of iterators?
26. What is the most accurate beginner-level explanation of iterators? (variation 357)
27. What is the most accurate beginner-level explanation of iterators? (variation 87)
28. Which statement best describes modules in Python Programming? (variation 95)
29. Which option is a correct use case for decorators in Python Programming? (variation 78)
30. Which statement best describes list comprehensions in Python Programming? (variation 80)
31. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
32. What is the most accurate beginner-level explanation of function parameters? (variation 102)
33. Which option is a correct use case for classes in Python Programming? (variation 73)
34. When working with Python Programming, why would a developer use virtual environments? (variation 106)
35. What is the most accurate beginner-level explanation of iterators? (variation 77)
36. What is the most accurate beginner-level explanation of iterators? (variation 107)

37. What is the most accurate beginner-level explanation of function parameters? (variation 352)
38. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
39. A student says 'exceptions' is not relevant to real projects. What is the best correction?
40. What is the most accurate beginner-level explanation of function parameters?
41. When working with Python Programming, why would a developer use virtual environments? (variation 96)
42. Which option is a correct use case for decorators in Python Programming? (variation 98)
43. Which option is a correct use case for decorators in Python Programming? (variation 358)
44. Which statement best describes modules in Python Programming?
45. Which statement best describes list comprehensions in Python Programming? (variation 100)
46. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
47. Which option is a correct use case for decorators in Python Programming?
48. Which option is a correct use case for classes in Python Programming?
49. When working with Python Programming, why would a developer use virtual environments? (variation 356)
50. When working with Python Programming, why would a developer use dictionaries? (variation 71)
51. What is the most accurate beginner-level explanation of iterators? (variation 97)
52. When working with Python Programming, why would a developer use virtual environments? (variation 76)
53. What is the most accurate beginner-level explanation of function parameters? (variation 82)
54. When working with Python Programming, why would a developer use virtual environments? (variation 86)
55. Which option is a correct use case for classes in Python Programming? (variation 353)

56. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)

57. A student says 'file handling' is not relevant to real projects. What is the best correction?

58. Which option is a correct use case for decorators in Python Programming? (variation 88)

59. When working with Python Programming, why would a developer use dictionaries? (variation 81)

60. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
