

State Board Previous Year Practice 2022 (2022)

Subject: General | Topic: Python Programming

1. When working with Python Programming, why would a developer use virtual environments?
2. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
3. Which option is a correct use case for decorators in Python Programming? (variation 78)
4. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
5. What is the most accurate beginner-level explanation of iterators? (variation 77)
6. When working with Python Programming, why would a developer use virtual environments? (variation 96)
7. Which option is a correct use case for decorators in Python Programming? (variation 358)
8. Which statement best describes modules in Python Programming? (variation 355)
9. Which statement best describes list comprehensions in Python Programming? (variation 350)
10. Which option is a correct use case for classes in Python Programming? (variation 93)
11. When working with Python Programming, why would a developer use dictionaries? (variation 91)
12. Which option is a correct use case for decorators in Python Programming? (variation 108)
13. When working with Python Programming, why would a developer use virtual environments? (variation 356)
14. What is the most accurate beginner-level explanation of iterators? (variation 87)
15. Which statement best describes modules in Python Programming? (variation 105)
16. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
17. Which statement best describes modules in Python Programming? (variation 75)

18. Which statement best describes modules in Python Programming? (variation 85)
19. A student says 'exceptions' is not relevant to real projects. What is the best correction?
20. What is the most accurate beginner-level explanation of function parameters? (variation 72)
21. A student says 'file handling' is not relevant to real projects. What is the best correction?
22. What is the most accurate beginner-level explanation of function parameters? (variation 82)
23. Which statement best describes list comprehensions in Python Programming? (variation 100)
24. Which option is a correct use case for classes in Python Programming? (variation 353)
25. What is the most accurate beginner-level explanation of function parameters?
26. When working with Python Programming, why would a developer use dictionaries? (variation 351)
27. Which statement best describes modules in Python Programming? (variation 95)
28. Which statement best describes list comprehensions in Python Programming? (variation 90)
29. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
30. Which option is a correct use case for decorators in Python Programming?
31. Which statement best describes modules in Python Programming?
32. Which option is a correct use case for classes in Python Programming? (variation 103)
33. When working with Python Programming, why would a developer use virtual environments? (variation 106)
34. Which option is a correct use case for decorators in Python Programming? (variation 88)
35. Which option is a correct use case for classes in Python Programming? (variation 83)
36. What is the most accurate beginner-level explanation of iterators?

37. What is the most accurate beginner-level explanation of iterators? (variation 97)
38. What is the most accurate beginner-level explanation of function parameters? (variation 352)
39. When working with Python Programming, why would a developer use dictionaries? (variation 81)
40. Which option is a correct use case for classes in Python Programming?
41. When working with Python Programming, why would a developer use virtual environments? (variation 86)
42. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
43. What is the most accurate beginner-level explanation of iterators? (variation 107)
44. What is the most accurate beginner-level explanation of function parameters? (variation 102)
45. Which option is a correct use case for classes in Python Programming? (variation 73)
46. When working with Python Programming, why would a developer use virtual environments? (variation 76)
47. When working with Python Programming, why would a developer use dictionaries? (variation 101)
48. Which statement best describes list comprehensions in Python Programming?
49. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
50. What is the most accurate beginner-level explanation of iterators? (variation 357)
51. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
52. Which statement best describes list comprehensions in Python Programming? (variation 70)
53. When working with Python Programming, why would a developer use dictionaries? (variation 71)
54. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
55. Which option is a correct use case for decorators in Python Programming? (variation 98)

56. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)

57. When working with Python Programming, why would a developer use dictionaries?

58. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)

59. Which statement best describes list comprehensions in Python Programming? (variation 80)

60. What is the most accurate beginner-level explanation of function parameters? (variation 92)
