

# State Board Previous Year Practice 2025 (2025)

Subject: General | Topic: Python Programming

1. What is the most accurate beginner-level explanation of function parameters? (variation 352)
2. What is the most accurate beginner-level explanation of iterators? (variation 97)
3. Which statement best describes modules in Python Programming? (variation 95)
4. When working with Python Programming, why would a developer use virtual environments? (variation 106)
5. What is the most accurate beginner-level explanation of iterators?
6. When working with Python Programming, why would a developer use virtual environments? (variation 96)
7. What is the most accurate beginner-level explanation of function parameters? (variation 82)
8. Which option is a correct use case for classes in Python Programming? (variation 83)
9. When working with Python Programming, why would a developer use dictionaries? (variation 71)
10. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
11. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
12. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
13. Which statement best describes modules in Python Programming? (variation 105)
14. What is the most accurate beginner-level explanation of iterators? (variation 77)
15. Which statement best describes modules in Python Programming? (variation 355)
16. What is the most accurate beginner-level explanation of function parameters? (variation 102)
17. Which statement best describes list comprehensions in Python Programming?

18. A student says 'file handling' is not relevant to real projects. What is the best correction?
19. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
20. Which statement best describes list comprehensions in Python Programming? (variation 90)
21. What is the most accurate beginner-level explanation of function parameters? (variation 92)
22. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
23. Which option is a correct use case for decorators in Python Programming? (variation 108)
24. Which option is a correct use case for decorators in Python Programming?
25. When working with Python Programming, why would a developer use dictionaries?
26. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
27. When working with Python Programming, why would a developer use virtual environments? (variation 86)
28. What is the most accurate beginner-level explanation of function parameters? (variation 72)
29. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
30. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
31. Which option is a correct use case for classes in Python Programming?
32. When working with Python Programming, why would a developer use dictionaries? (variation 101)
33. Which option is a correct use case for decorators in Python Programming? (variation 88)
34. When working with Python Programming, why would a developer use virtual environments? (variation 356)
35. A student says 'exceptions' is not relevant to real projects. What is the best correction?
36. Which statement best describes modules in Python Programming?

37. Which option is a correct use case for classes in Python Programming? (variation 353)
38. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
39. What is the most accurate beginner-level explanation of function parameters?
40. Which statement best describes list comprehensions in Python Programming? (variation 350)
41. When working with Python Programming, why would a developer use virtual environments? (variation 76)
42. Which statement best describes list comprehensions in Python Programming? (variation 100)
43. When working with Python Programming, why would a developer use virtual environments?
44. Which option is a correct use case for classes in Python Programming? (variation 73)
45. Which statement best describes modules in Python Programming? (variation 85)
46. Which option is a correct use case for classes in Python Programming? (variation 103)
47. Which statement best describes list comprehensions in Python Programming? (variation 70)
48. Which option is a correct use case for decorators in Python Programming? (variation 358)
49. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
50. When working with Python Programming, why would a developer use dictionaries? (variation 351)
51. What is the most accurate beginner-level explanation of iterators? (variation 107)
52. What is the most accurate beginner-level explanation of iterators? (variation 87)
53. Which option is a correct use case for decorators in Python Programming? (variation 98)
54. Which statement best describes modules in Python Programming? (variation 75)
55. When working with Python Programming, why would a developer use dictionaries? (variation 91)

56. Which statement best describes list comprehensions in Python Programming? (variation 80)

57. Which option is a correct use case for classes in Python Programming? (variation 93)

58. Which option is a correct use case for decorators in Python Programming? (variation 78)

59. What is the most accurate beginner-level explanation of iterators? (variation 357)

60. When working with Python Programming, why would a developer use dictionaries? (variation 81)
