

IIT-JEE Previous Year Practice 2018 (2018)

Subject: General | Topic: Python Programming

1. What is the most accurate beginner-level explanation of iterators? (variation 357)
2. Which option is a correct use case for decorators in Python Programming? (variation 358)
3. Which statement best describes modules in Python Programming? (variation 75)
4. A student says 'file handling' is not relevant to real projects. What is the best correction?
5. Which statement best describes modules in Python Programming? (variation 355)
6. When working with Python Programming, why would a developer use virtual environments? (variation 96)
7. Which option is a correct use case for classes in Python Programming?
8. Which option is a correct use case for decorators in Python Programming?
9. Which option is a correct use case for decorators in Python Programming? (variation 88)
10. What is the most accurate beginner-level explanation of function parameters? (variation 352)
11. A student says 'exceptions' is not relevant to real projects. What is the best correction?
12. Which option is a correct use case for classes in Python Programming? (variation 73)
13. When working with Python Programming, why would a developer use virtual environments? (variation 356)
14. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
15. Which statement best describes list comprehensions in Python Programming? (variation 80)
16. Which statement best describes list comprehensions in Python Programming?
17. When working with Python Programming, why would a developer use virtual environments? (variation 106)

18. Which statement best describes modules in Python Programming?
19. Which option is a correct use case for decorators in Python Programming? (variation 78)
20. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
21. Which statement best describes list comprehensions in Python Programming? (variation 100)
22. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
23. Which statement best describes modules in Python Programming? (variation 85)
24. Which option is a correct use case for classes in Python Programming? (variation 103)
25. What is the most accurate beginner-level explanation of function parameters? (variation 102)
26. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
27. What is the most accurate beginner-level explanation of iterators? (variation 77)
28. When working with Python Programming, why would a developer use dictionaries? (variation 91)
29. When working with Python Programming, why would a developer use dictionaries? (variation 101)
30. What is the most accurate beginner-level explanation of function parameters?
31. What is the most accurate beginner-level explanation of iterators? (variation 97)
32. Which statement best describes list comprehensions in Python Programming? (variation 70)
33. Which statement best describes modules in Python Programming? (variation 95)
34. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
35. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
36. Which statement best describes list comprehensions in Python Programming? (variation 350)

37. Which option is a correct use case for classes in Python Programming? (variation 93)
38. What is the most accurate beginner-level explanation of iterators? (variation 87)
39. What is the most accurate beginner-level explanation of function parameters? (variation 92)
40. When working with Python Programming, why would a developer use virtual environments? (variation 76)
41. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
42. When working with Python Programming, why would a developer use dictionaries? (variation 71)
43. What is the most accurate beginner-level explanation of function parameters? (variation 72)
44. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
45. When working with Python Programming, why would a developer use dictionaries?
46. Which option is a correct use case for classes in Python Programming? (variation 83)
47. What is the most accurate beginner-level explanation of iterators?
48. What is the most accurate beginner-level explanation of function parameters? (variation 82)
49. When working with Python Programming, why would a developer use virtual environments?
50. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
51. What is the most accurate beginner-level explanation of iterators? (variation 107)
52. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
53. When working with Python Programming, why would a developer use virtual environments? (variation 86)
54. Which option is a correct use case for decorators in Python Programming? (variation 108)
55. When working with Python Programming, why would a developer use dictionaries? (variation 81)

56. When working with Python Programming, why would a developer use dictionaries? (variation 351)

57. Which statement best describes list comprehensions in Python Programming? (variation 90)

58. Which statement best describes modules in Python Programming? (variation 105)

59. Which option is a correct use case for decorators in Python Programming? (variation 98)

60. Which option is a correct use case for classes in Python Programming? (variation 353)
