

IIT-JEE Previous Year Practice 2020 (2020)

Subject: General | Topic: Python Programming

1. Which statement best describes list comprehensions in Python Programming? (variation 80)
2. What is the most accurate beginner-level explanation of iterators? (variation 107)
3. Which statement best describes list comprehensions in Python Programming? (variation 100)
4. When working with Python Programming, why would a developer use dictionaries? (variation 91)
5. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
6. What is the most accurate beginner-level explanation of function parameters? (variation 92)
7. Which statement best describes list comprehensions in Python Programming? (variation 350)
8. Which option is a correct use case for decorators in Python Programming?
9. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
10. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
11. What is the most accurate beginner-level explanation of iterators? (variation 87)
12. Which option is a correct use case for decorators in Python Programming? (variation 98)
13. What is the most accurate beginner-level explanation of function parameters? (variation 82)
14. Which option is a correct use case for classes in Python Programming? (variation 93)
15. When working with Python Programming, why would a developer use virtual environments? (variation 106)
16. Which option is a correct use case for decorators in Python Programming? (variation 108)
17. Which statement best describes list comprehensions in Python Programming?

18. Which statement best describes modules in Python Programming? (variation 75)
19. When working with Python Programming, why would a developer use dictionaries?
20. Which option is a correct use case for decorators in Python Programming? (variation 88)
21. Which option is a correct use case for decorators in Python Programming? (variation 358)
22. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
23. Which statement best describes modules in Python Programming? (variation 95)
24. What is the most accurate beginner-level explanation of iterators? (variation 97)
25. What is the most accurate beginner-level explanation of function parameters? (variation 352)
26. Which option is a correct use case for decorators in Python Programming? (variation 78)
27. A student says 'file handling' is not relevant to real projects. What is the best correction?
28. When working with Python Programming, why would a developer use dictionaries? (variation 101)
29. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
30. A student says 'exceptions' is not relevant to real projects. What is the best correction?
31. Which option is a correct use case for classes in Python Programming? (variation 353)
32. What is the most accurate beginner-level explanation of function parameters? (variation 102)
33. What is the most accurate beginner-level explanation of function parameters? (variation 72)
34. Which option is a correct use case for classes in Python Programming? (variation 73)
35. Which option is a correct use case for classes in Python Programming?
36. When working with Python Programming, why would a developer use virtual environments? (variation 96)

37. When working with Python Programming, why would a developer use virtual environments? (variation 76)
38. Which statement best describes modules in Python Programming?
39. When working with Python Programming, why would a developer use virtual environments?
40. Which statement best describes list comprehensions in Python Programming? (variation 70)
41. When working with Python Programming, why would a developer use dictionaries? (variation 71)
42. Which statement best describes list comprehensions in Python Programming? (variation 90)
43. When working with Python Programming, why would a developer use dictionaries? (variation 351)
44. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
45. Which statement best describes modules in Python Programming? (variation 355)
46. Which statement best describes modules in Python Programming? (variation 85)
47. When working with Python Programming, why would a developer use dictionaries? (variation 81)
48. What is the most accurate beginner-level explanation of iterators?
49. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
50. Which option is a correct use case for classes in Python Programming? (variation 83)
51. Which option is a correct use case for classes in Python Programming? (variation 103)
52. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
53. When working with Python Programming, why would a developer use virtual environments? (variation 356)
54. When working with Python Programming, why would a developer use virtual environments? (variation 86)
55. Which statement best describes modules in Python Programming? (variation 105)

56. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)

57. What is the most accurate beginner-level explanation of function parameters?

58. What is the most accurate beginner-level explanation of iterators? (variation 77)

59. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)

60. What is the most accurate beginner-level explanation of iterators? (variation 357)
