

IIT-JEE Previous Year Practice 2023 (2023)

Subject: General | Topic: Python Programming

1. When working with Python Programming, why would a developer use virtual environments? (variation 96)
2. What is the most accurate beginner-level explanation of iterators? (variation 77)
3. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
4. What is the most accurate beginner-level explanation of function parameters? (variation 92)
5. Which statement best describes list comprehensions in Python Programming? (variation 80)
6. What is the most accurate beginner-level explanation of iterators?
7. When working with Python Programming, why would a developer use dictionaries?
8. Which option is a correct use case for decorators in Python Programming? (variation 98)
9. Which statement best describes modules in Python Programming? (variation 355)
10. What is the most accurate beginner-level explanation of function parameters? (variation 102)
11. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
12. Which statement best describes list comprehensions in Python Programming? (variation 350)
13. Which option is a correct use case for decorators in Python Programming?
14. Which option is a correct use case for classes in Python Programming? (variation 353)
15. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
16. Which statement best describes modules in Python Programming? (variation 105)
17. Which statement best describes list comprehensions in Python Programming? (variation 70)

18. What is the most accurate beginner-level explanation of function parameters? (variation 72)
19. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
20. When working with Python Programming, why would a developer use virtual environments? (variation 106)
21. Which option is a correct use case for classes in Python Programming? (variation 103)
22. When working with Python Programming, why would a developer use virtual environments? (variation 86)
23. When working with Python Programming, why would a developer use dictionaries? (variation 351)
24. What is the most accurate beginner-level explanation of iterators? (variation 107)
25. Which statement best describes modules in Python Programming? (variation 75)
26. Which option is a correct use case for decorators in Python Programming? (variation 78)
27. What is the most accurate beginner-level explanation of iterators? (variation 357)
28. Which option is a correct use case for classes in Python Programming? (variation 83)
29. When working with Python Programming, why would a developer use dictionaries? (variation 101)
30. Which option is a correct use case for classes in Python Programming? (variation 93)
31. Which statement best describes modules in Python Programming? (variation 95)
32. A student says 'file handling' is not relevant to real projects. What is the best correction?
33. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
34. When working with Python Programming, why would a developer use dictionaries? (variation 91)
35. Which option is a correct use case for decorators in Python Programming? (variation 358)
36. Which statement best describes list comprehensions in Python Programming? (variation 90)

37. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
38. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
39. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
40. Which option is a correct use case for decorators in Python Programming? (variation 88)
41. Which statement best describes modules in Python Programming? (variation 85)
42. What is the most accurate beginner-level explanation of function parameters? (variation 82)
43. When working with Python Programming, why would a developer use dictionaries? (variation 81)
44. A student says 'exceptions' is not relevant to real projects. What is the best correction?
45. Which option is a correct use case for classes in Python Programming?
46. Which statement best describes modules in Python Programming?
47. What is the most accurate beginner-level explanation of function parameters? (variation 352)
48. What is the most accurate beginner-level explanation of function parameters?
49. When working with Python Programming, why would a developer use virtual environments?
50. What is the most accurate beginner-level explanation of iterators? (variation 87)
51. Which statement best describes list comprehensions in Python Programming?
52. What is the most accurate beginner-level explanation of iterators? (variation 97)
53. When working with Python Programming, why would a developer use dictionaries? (variation 71)
54. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
55. Which option is a correct use case for decorators in Python Programming? (variation 108)

56. When working with Python Programming, why would a developer use virtual environments? (variation 76)

57. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)

58. Which option is a correct use case for classes in Python Programming? (variation 73)

59. Which statement best describes list comprehensions in Python Programming? (variation 100)

60. When working with Python Programming, why would a developer use virtual environments? (variation 356)
