

IIT-JEE Previous Year Practice 2025 (2025)

Subject: General | Topic: Python Programming

1. Which statement best describes list comprehensions in Python Programming? (variation 350)
2. When working with Python Programming, why would a developer use dictionaries? (variation 71)
3. When working with Python Programming, why would a developer use virtual environments?
4. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
5. When working with Python Programming, why would a developer use virtual environments? (variation 356)
6. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
7. Which statement best describes modules in Python Programming? (variation 105)
8. Which statement best describes list comprehensions in Python Programming? (variation 80)
9. Which option is a correct use case for classes in Python Programming? (variation 103)
10. What is the most accurate beginner-level explanation of function parameters? (variation 72)
11. Which statement best describes modules in Python Programming? (variation 355)
12. Which option is a correct use case for classes in Python Programming? (variation 353)
13. Which statement best describes list comprehensions in Python Programming?
14. When working with Python Programming, why would a developer use virtual environments? (variation 86)
15. When working with Python Programming, why would a developer use virtual environments? (variation 96)
16. What is the most accurate beginner-level explanation of iterators?
17. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)

18. What is the most accurate beginner-level explanation of iterators? (variation 357)
19. A student says 'exceptions' is not relevant to real projects. What is the best correction?
20. Which option is a correct use case for classes in Python Programming?
21. What is the most accurate beginner-level explanation of function parameters? (variation 92)
22. What is the most accurate beginner-level explanation of iterators? (variation 77)
23. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
24. Which statement best describes modules in Python Programming? (variation 85)
25. Which option is a correct use case for decorators in Python Programming?
26. Which option is a correct use case for classes in Python Programming? (variation 83)
27. Which option is a correct use case for decorators in Python Programming? (variation 78)
28. Which statement best describes modules in Python Programming? (variation 75)
29. Which option is a correct use case for classes in Python Programming? (variation 73)
30. What is the most accurate beginner-level explanation of iterators? (variation 97)
31. Which option is a correct use case for classes in Python Programming? (variation 93)
32. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
33. What is the most accurate beginner-level explanation of iterators? (variation 107)
34. Which statement best describes list comprehensions in Python Programming? (variation 90)
35. When working with Python Programming, why would a developer use dictionaries? (variation 351)
36. What is the most accurate beginner-level explanation of iterators? (variation 87)

37. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
38. When working with Python Programming, why would a developer use dictionaries? (variation 101)
39. Which statement best describes list comprehensions in Python Programming? (variation 100)
40. Which option is a correct use case for decorators in Python Programming? (variation 98)
41. Which statement best describes modules in Python Programming?
42. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
43. When working with Python Programming, why would a developer use virtual environments? (variation 106)
44. When working with Python Programming, why would a developer use dictionaries? (variation 81)
45. What is the most accurate beginner-level explanation of function parameters? (variation 352)
46. What is the most accurate beginner-level explanation of function parameters? (variation 82)
47. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
48. When working with Python Programming, why would a developer use dictionaries?
49. When working with Python Programming, why would a developer use virtual environments? (variation 76)
50. A student says 'file handling' is not relevant to real projects. What is the best correction?
51. When working with Python Programming, why would a developer use dictionaries? (variation 91)
52. What is the most accurate beginner-level explanation of function parameters?
53. Which option is a correct use case for decorators in Python Programming? (variation 358)
54. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
55. What is the most accurate beginner-level explanation of function parameters? (variation 102)

56. Which statement best describes modules in Python Programming? (variation 95)

57. Which statement best describes list comprehensions in Python Programming? (variation 70)

58. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)

59. Which option is a correct use case for decorators in Python Programming? (variation 88)

60. Which option is a correct use case for decorators in Python Programming? (variation 108)
