

NEET Previous Year Practice 2017 (2017)

Subject: General | Topic: Python Programming

1. When working with Python Programming, why would a developer use dictionaries? (variation 71)
2. Which option is a correct use case for classes in Python Programming?
3. When working with Python Programming, why would a developer use dictionaries? (variation 91)
4. Which option is a correct use case for decorators in Python Programming? (variation 358)
5. When working with Python Programming, why would a developer use dictionaries? (variation 101)
6. Which option is a correct use case for classes in Python Programming? (variation 103)
7. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
8. Which option is a correct use case for decorators in Python Programming? (variation 88)
9. Which statement best describes modules in Python Programming? (variation 105)
10. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
11. Which statement best describes list comprehensions in Python Programming? (variation 100)
12. Which statement best describes list comprehensions in Python Programming?
13. When working with Python Programming, why would a developer use virtual environments? (variation 76)
14. When working with Python Programming, why would a developer use virtual environments? (variation 106)
15. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
16. Which option is a correct use case for decorators in Python Programming? (variation 108)
17. Which statement best describes modules in Python Programming?

18. When working with Python Programming, why would a developer use virtual environments? (variation 96)
19. Which statement best describes list comprehensions in Python Programming? (variation 80)
20. What is the most accurate beginner-level explanation of iterators? (variation 77)
21. What is the most accurate beginner-level explanation of iterators? (variation 357)
22. Which statement best describes list comprehensions in Python Programming? (variation 350)
23. Which statement best describes modules in Python Programming? (variation 355)
24. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
25. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
26. Which statement best describes modules in Python Programming? (variation 95)
27. When working with Python Programming, why would a developer use virtual environments?
28. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
29. Which option is a correct use case for decorators in Python Programming? (variation 78)
30. A student says 'file handling' is not relevant to real projects. What is the best correction?
31. When working with Python Programming, why would a developer use dictionaries?
32. What is the most accurate beginner-level explanation of function parameters? (variation 102)
33. Which option is a correct use case for classes in Python Programming? (variation 73)
34. Which statement best describes list comprehensions in Python Programming? (variation 90)
35. Which option is a correct use case for decorators in Python Programming? (variation 98)
36. Which statement best describes modules in Python Programming? (variation 85)

37. What is the most accurate beginner-level explanation of function parameters? (variation 352)
38. Which option is a correct use case for decorators in Python Programming?
39. Which statement best describes list comprehensions in Python Programming? (variation 70)
40. Which option is a correct use case for classes in Python Programming? (variation 83)
41. When working with Python Programming, why would a developer use dictionaries? (variation 351)
42. What is the most accurate beginner-level explanation of function parameters? (variation 82)
43. Which option is a correct use case for classes in Python Programming? (variation 93)
44. When working with Python Programming, why would a developer use virtual environments? (variation 86)
45. What is the most accurate beginner-level explanation of iterators? (variation 97)
46. When working with Python Programming, why would a developer use dictionaries? (variation 81)
47. What is the most accurate beginner-level explanation of function parameters? (variation 92)
48. What is the most accurate beginner-level explanation of iterators?
49. What is the most accurate beginner-level explanation of iterators? (variation 107)
50. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
51. Which statement best describes modules in Python Programming? (variation 75)
52. Which option is a correct use case for classes in Python Programming? (variation 353)
53. A student says 'exceptions' is not relevant to real projects. What is the best correction?
54. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
55. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)

56. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
57. What is the most accurate beginner-level explanation of function parameters? (variation 72)
58. What is the most accurate beginner-level explanation of iterators? (variation 87)
59. What is the most accurate beginner-level explanation of function parameters?
60. When working with Python Programming, why would a developer use virtual environments? (variation 356)
