

# NEET Previous Year Practice 2018 (2018)

Subject: General | Topic: Python Programming

1. What is the most accurate beginner-level explanation of function parameters? (variation 352)
2. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
3. Which option is a correct use case for classes in Python Programming? (variation 73)
4. Which statement best describes list comprehensions in Python Programming? (variation 100)
5. What is the most accurate beginner-level explanation of function parameters?
6. Which option is a correct use case for decorators in Python Programming? (variation 108)
7. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
8. What is the most accurate beginner-level explanation of function parameters? (variation 72)
9. Which statement best describes list comprehensions in Python Programming? (variation 70)
10. What is the most accurate beginner-level explanation of iterators?
11. What is the most accurate beginner-level explanation of function parameters? (variation 102)
12. When working with Python Programming, why would a developer use virtual environments? (variation 96)
13. When working with Python Programming, why would a developer use virtual environments? (variation 106)
14. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
15. Which statement best describes list comprehensions in Python Programming? (variation 80)
16. Which statement best describes modules in Python Programming? (variation 105)
17. When working with Python Programming, why would a developer use dictionaries? (variation 101)

18. What is the most accurate beginner-level explanation of iterators? (variation 77)
19. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
20. Which option is a correct use case for classes in Python Programming? (variation 83)
21. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
22. What is the most accurate beginner-level explanation of iterators? (variation 107)
23. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
24. What is the most accurate beginner-level explanation of function parameters? (variation 92)
25. What is the most accurate beginner-level explanation of iterators? (variation 357)
26. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
27. Which option is a correct use case for decorators in Python Programming? (variation 98)
28. Which option is a correct use case for classes in Python Programming? (variation 93)
29. Which statement best describes modules in Python Programming? (variation 75)
30. Which statement best describes list comprehensions in Python Programming? (variation 90)
31. Which option is a correct use case for decorators in Python Programming?
32. When working with Python Programming, why would a developer use virtual environments?
33. What is the most accurate beginner-level explanation of function parameters? (variation 82)
34. What is the most accurate beginner-level explanation of iterators? (variation 87)
35. What is the most accurate beginner-level explanation of iterators? (variation 97)
36. Which option is a correct use case for classes in Python Programming? (variation 103)

37. When working with Python Programming, why would a developer use dictionaries? (variation 71)
38. Which statement best describes modules in Python Programming? (variation 355)
39. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
40. A student says 'exceptions' is not relevant to real projects. What is the best correction?
41. Which option is a correct use case for decorators in Python Programming? (variation 358)
42. When working with Python Programming, why would a developer use virtual environments? (variation 86)
43. When working with Python Programming, why would a developer use virtual environments? (variation 76)
44. When working with Python Programming, why would a developer use dictionaries?
45. When working with Python Programming, why would a developer use dictionaries? (variation 351)
46. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
47. Which statement best describes list comprehensions in Python Programming? (variation 350)
48. Which statement best describes modules in Python Programming? (variation 85)
49. Which option is a correct use case for classes in Python Programming?
50. Which statement best describes modules in Python Programming? (variation 95)
51. When working with Python Programming, why would a developer use virtual environments? (variation 356)
52. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
53. Which statement best describes modules in Python Programming?
54. Which statement best describes list comprehensions in Python Programming?
55. When working with Python Programming, why would a developer use dictionaries? (variation 91)

56. Which option is a correct use case for decorators in Python Programming? (variation 88)

57. Which option is a correct use case for decorators in Python Programming? (variation 78)

58. Which option is a correct use case for classes in Python Programming? (variation 353)

59. A student says 'file handling' is not relevant to real projects. What is the best correction?

60. When working with Python Programming, why would a developer use dictionaries? (variation 81)
