

NEET Previous Year Practice 2019 (2019)

Subject: General | Topic: Python Programming

1. When working with Python Programming, why would a developer use dictionaries?
2. Which statement best describes modules in Python Programming?
3. What is the most accurate beginner-level explanation of function parameters? (variation 102)
4. Which statement best describes list comprehensions in Python Programming?
5. Which option is a correct use case for classes in Python Programming? (variation 353)
6. Which option is a correct use case for decorators in Python Programming? (variation 358)
7. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
8. Which option is a correct use case for classes in Python Programming?
9. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
10. Which option is a correct use case for decorators in Python Programming?
11. Which statement best describes list comprehensions in Python Programming? (variation 350)
12. When working with Python Programming, why would a developer use dictionaries? (variation 101)
13. A student says 'exceptions' is not relevant to real projects. What is the best correction?
14. When working with Python Programming, why would a developer use virtual environments? (variation 96)
15. Which option is a correct use case for classes in Python Programming? (variation 73)
16. Which option is a correct use case for decorators in Python Programming? (variation 88)
17. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)

18. Which statement best describes list comprehensions in Python Programming? (variation 80)
19. Which option is a correct use case for classes in Python Programming? (variation 93)
20. Which option is a correct use case for classes in Python Programming? (variation 103)
21. When working with Python Programming, why would a developer use virtual environments? (variation 106)
22. When working with Python Programming, why would a developer use virtual environments? (variation 86)
23. A student says 'file handling' is not relevant to real projects. What is the best correction?
24. When working with Python Programming, why would a developer use virtual environments?
25. Which statement best describes modules in Python Programming? (variation 105)
26. When working with Python Programming, why would a developer use dictionaries? (variation 81)
27. What is the most accurate beginner-level explanation of iterators?
28. What is the most accurate beginner-level explanation of function parameters?
29. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
30. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
31. When working with Python Programming, why would a developer use virtual environments? (variation 356)
32. Which option is a correct use case for decorators in Python Programming? (variation 108)
33. Which option is a correct use case for classes in Python Programming? (variation 83)
34. When working with Python Programming, why would a developer use dictionaries? (variation 91)
35. What is the most accurate beginner-level explanation of iterators? (variation 97)
36. Which option is a correct use case for decorators in Python Programming? (variation 78)

37. Which statement best describes list comprehensions in Python Programming? (variation 70)
38. What is the most accurate beginner-level explanation of iterators? (variation 107)
39. Which statement best describes modules in Python Programming? (variation 85)
40. When working with Python Programming, why would a developer use dictionaries? (variation 71)
41. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
42. Which statement best describes modules in Python Programming? (variation 95)
43. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
44. What is the most accurate beginner-level explanation of function parameters? (variation 352)
45. What is the most accurate beginner-level explanation of iterators? (variation 357)
46. What is the most accurate beginner-level explanation of function parameters? (variation 82)
47. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
48. Which statement best describes modules in Python Programming? (variation 355)
49. Which option is a correct use case for decorators in Python Programming? (variation 98)
50. Which statement best describes modules in Python Programming? (variation 75)
51. What is the most accurate beginner-level explanation of iterators? (variation 77)
52. What is the most accurate beginner-level explanation of iterators? (variation 87)
53. Which statement best describes list comprehensions in Python Programming? (variation 90)
54. When working with Python Programming, why would a developer use dictionaries? (variation 351)
55. What is the most accurate beginner-level explanation of function parameters? (variation 72)

56. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
57. What is the most accurate beginner-level explanation of function parameters? (variation 92)
58. When working with Python Programming, why would a developer use virtual environments? (variation 76)
59. Which statement best describes list comprehensions in Python Programming? (variation 100)
60. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
