

NEET Previous Year Practice 2021 (2021)

Subject: General | Topic: Python Programming

1. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
2. What is the most accurate beginner-level explanation of function parameters? (variation 352)
3. Which statement best describes list comprehensions in Python Programming?
4. Which statement best describes list comprehensions in Python Programming? (variation 100)
5. Which option is a correct use case for classes in Python Programming? (variation 73)
6. What is the most accurate beginner-level explanation of iterators?
7. Which statement best describes modules in Python Programming? (variation 355)
8. Which statement best describes modules in Python Programming?
9. Which option is a correct use case for decorators in Python Programming? (variation 88)
10. When working with Python Programming, why would a developer use dictionaries? (variation 71)
11. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
12. Which option is a correct use case for decorators in Python Programming? (variation 98)
13. When working with Python Programming, why would a developer use virtual environments?
14. Which option is a correct use case for classes in Python Programming?
15. What is the most accurate beginner-level explanation of function parameters? (variation 102)
16. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
17. Which statement best describes list comprehensions in Python Programming? (variation 70)

18. Which option is a correct use case for decorators in Python Programming? (variation 78)
19. A student says 'exceptions' is not relevant to real projects. What is the best correction?
20. When working with Python Programming, why would a developer use dictionaries? (variation 351)
21. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
22. When working with Python Programming, why would a developer use virtual environments? (variation 86)
23. What is the most accurate beginner-level explanation of iterators? (variation 77)
24. Which option is a correct use case for classes in Python Programming? (variation 93)
25. A student says 'file handling' is not relevant to real projects. What is the best correction?
26. Which statement best describes list comprehensions in Python Programming? (variation 350)
27. Which option is a correct use case for classes in Python Programming? (variation 103)
28. Which option is a correct use case for decorators in Python Programming? (variation 108)
29. Which statement best describes list comprehensions in Python Programming? (variation 90)
30. What is the most accurate beginner-level explanation of iterators? (variation 357)
31. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
32. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
33. When working with Python Programming, why would a developer use dictionaries? (variation 101)
34. When working with Python Programming, why would a developer use dictionaries?
35. When working with Python Programming, why would a developer use virtual environments? (variation 356)
36. Which option is a correct use case for classes in Python Programming? (variation 353)

37. When working with Python Programming, why would a developer use virtual environments? (variation 76)
38. Which statement best describes list comprehensions in Python Programming? (variation 80)
39. Which option is a correct use case for classes in Python Programming? (variation 83)
40. Which statement best describes modules in Python Programming? (variation 105)
41. Which option is a correct use case for decorators in Python Programming? (variation 358)
42. When working with Python Programming, why would a developer use dictionaries? (variation 91)
43. Which statement best describes modules in Python Programming? (variation 85)
44. What is the most accurate beginner-level explanation of function parameters?
45. What is the most accurate beginner-level explanation of iterators? (variation 87)
46. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
47. Which statement best describes modules in Python Programming? (variation 95)
48. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
49. Which statement best describes modules in Python Programming? (variation 75)
50. What is the most accurate beginner-level explanation of function parameters? (variation 82)
51. When working with Python Programming, why would a developer use dictionaries? (variation 81)
52. What is the most accurate beginner-level explanation of iterators? (variation 97)
53. What is the most accurate beginner-level explanation of function parameters? (variation 72)
54. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
55. When working with Python Programming, why would a developer use virtual environments? (variation 106)

56. What is the most accurate beginner-level explanation of iterators? (variation 107)
57. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
58. What is the most accurate beginner-level explanation of function parameters? (variation 92)
59. Which option is a correct use case for decorators in Python Programming?
60. When working with Python Programming, why would a developer use virtual environments? (variation 96)
