

NEET Previous Year Practice 2022 (2022)

Subject: General | Topic: Python Programming

1. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
2. Which statement best describes list comprehensions in Python Programming? (variation 100)
3. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
4. Which statement best describes list comprehensions in Python Programming?
5. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
6. Which statement best describes modules in Python Programming? (variation 75)
7. Which option is a correct use case for classes in Python Programming? (variation 73)
8. Which option is a correct use case for decorators in Python Programming? (variation 108)
9. Which statement best describes modules in Python Programming? (variation 355)
10. Which option is a correct use case for decorators in Python Programming? (variation 98)
11. When working with Python Programming, why would a developer use virtual environments? (variation 356)
12. Which option is a correct use case for classes in Python Programming? (variation 93)
13. Which option is a correct use case for classes in Python Programming?
14. Which statement best describes modules in Python Programming?
15. Which statement best describes list comprehensions in Python Programming? (variation 70)
16. Which option is a correct use case for decorators in Python Programming? (variation 78)
17. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)

18. Which statement best describes list comprehensions in Python Programming? (variation 350)
19. What is the most accurate beginner-level explanation of iterators?
20. What is the most accurate beginner-level explanation of function parameters? (variation 92)
21. What is the most accurate beginner-level explanation of function parameters? (variation 102)
22. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
23. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
24. Which option is a correct use case for decorators in Python Programming? (variation 88)
25. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
26. When working with Python Programming, why would a developer use dictionaries? (variation 71)
27. What is the most accurate beginner-level explanation of iterators? (variation 357)
28. When working with Python Programming, why would a developer use virtual environments? (variation 86)
29. What is the most accurate beginner-level explanation of function parameters? (variation 352)
30. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
31. Which option is a correct use case for classes in Python Programming? (variation 83)
32. Which option is a correct use case for decorators in Python Programming?
33. What is the most accurate beginner-level explanation of iterators? (variation 107)
34. Which option is a correct use case for decorators in Python Programming? (variation 358)
35. When working with Python Programming, why would a developer use virtual environments?
36. Which statement best describes list comprehensions in Python Programming? (variation 80)

37. Which statement best describes modules in Python Programming? (variation 105)
38. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
39. A student says 'exceptions' is not relevant to real projects. What is the best correction?
40. When working with Python Programming, why would a developer use virtual environments? (variation 96)
41. A student says 'file handling' is not relevant to real projects. What is the best correction?
42. What is the most accurate beginner-level explanation of iterators? (variation 97)
43. When working with Python Programming, why would a developer use virtual environments? (variation 76)
44. What is the most accurate beginner-level explanation of function parameters? (variation 82)
45. What is the most accurate beginner-level explanation of iterators? (variation 87)
46. When working with Python Programming, why would a developer use dictionaries? (variation 351)
47. What is the most accurate beginner-level explanation of function parameters?
48. Which option is a correct use case for classes in Python Programming? (variation 353)
49. When working with Python Programming, why would a developer use dictionaries?
50. What is the most accurate beginner-level explanation of iterators? (variation 77)
51. When working with Python Programming, why would a developer use dictionaries? (variation 81)
52. What is the most accurate beginner-level explanation of function parameters? (variation 72)
53. Which statement best describes list comprehensions in Python Programming? (variation 90)
54. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
55. Which option is a correct use case for classes in Python Programming? (variation 103)

56. Which statement best describes modules in Python Programming? (variation 85)

57. When working with Python Programming, why would a developer use dictionaries? (variation 91)

58. When working with Python Programming, why would a developer use dictionaries? (variation 101)

59. Which statement best describes modules in Python Programming? (variation 95)

60. When working with Python Programming, why would a developer use virtual environments? (variation 106)
