

NEET Previous Year Practice 2023 (2023)

Subject: General | Topic: Python Programming

1. What is the most accurate beginner-level explanation of function parameters? (variation 102)
2. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
3. When working with Python Programming, why would a developer use dictionaries?
4. Which option is a correct use case for classes in Python Programming? (variation 103)
5. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
6. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
7. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
8. What is the most accurate beginner-level explanation of iterators? (variation 107)
9. A student says 'file handling' is not relevant to real projects. What is the best correction?
10. When working with Python Programming, why would a developer use virtual environments?
11. Which statement best describes modules in Python Programming? (variation 85)
12. When working with Python Programming, why would a developer use dictionaries? (variation 81)
13. Which statement best describes list comprehensions in Python Programming? (variation 80)
14. When working with Python Programming, why would a developer use virtual environments? (variation 96)
15. What is the most accurate beginner-level explanation of function parameters? (variation 72)
16. Which option is a correct use case for decorators in Python Programming?
17. Which option is a correct use case for classes in Python Programming? (variation 83)

18. Which option is a correct use case for decorators in Python Programming? (variation 108)
19. Which statement best describes list comprehensions in Python Programming? (variation 350)
20. What is the most accurate beginner-level explanation of iterators?
21. What is the most accurate beginner-level explanation of function parameters? (variation 92)
22. When working with Python Programming, why would a developer use virtual environments? (variation 106)
23. Which option is a correct use case for classes in Python Programming?
24. Which option is a correct use case for decorators in Python Programming? (variation 98)
25. Which statement best describes list comprehensions in Python Programming?
26. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
27. A student says 'exceptions' is not relevant to real projects. What is the best correction?
28. Which statement best describes modules in Python Programming? (variation 95)
29. Which option is a correct use case for decorators in Python Programming? (variation 78)
30. What is the most accurate beginner-level explanation of iterators? (variation 357)
31. Which option is a correct use case for classes in Python Programming? (variation 73)
32. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
33. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
34. What is the most accurate beginner-level explanation of iterators? (variation 87)
35. Which statement best describes modules in Python Programming? (variation 75)
36. When working with Python Programming, why would a developer use dictionaries? (variation 71)

37. Which statement best describes modules in Python Programming? (variation 105)
38. Which statement best describes list comprehensions in Python Programming? (variation 90)
39. What is the most accurate beginner-level explanation of function parameters? (variation 352)
40. When working with Python Programming, why would a developer use dictionaries? (variation 101)
41. What is the most accurate beginner-level explanation of function parameters? (variation 82)
42. When working with Python Programming, why would a developer use virtual environments? (variation 76)
43. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
44. When working with Python Programming, why would a developer use dictionaries? (variation 351)
45. Which statement best describes modules in Python Programming? (variation 355)
46. What is the most accurate beginner-level explanation of iterators? (variation 77)
47. Which statement best describes modules in Python Programming?
48. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
49. When working with Python Programming, why would a developer use virtual environments? (variation 86)
50. What is the most accurate beginner-level explanation of function parameters?
51. Which statement best describes list comprehensions in Python Programming? (variation 70)
52. Which option is a correct use case for decorators in Python Programming? (variation 358)
53. Which option is a correct use case for decorators in Python Programming? (variation 88)
54. Which statement best describes list comprehensions in Python Programming? (variation 100)
55. Which option is a correct use case for classes in Python Programming? (variation 353)

56. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)

57. When working with Python Programming, why would a developer use virtual environments? (variation 356)

58. When working with Python Programming, why would a developer use dictionaries? (variation 91)

59. What is the most accurate beginner-level explanation of iterators? (variation 97)

60. Which option is a correct use case for classes in Python Programming? (variation 93)
