

NEET Previous Year Practice 2024 (2024)

Subject: General | Topic: Python Programming

1. Which statement best describes modules in Python Programming? (variation 85)
2. When working with Python Programming, why would a developer use virtual environments? (variation 86)
3. Which statement best describes modules in Python Programming? (variation 75)
4. What is the most accurate beginner-level explanation of function parameters? (variation 82)
5. When working with Python Programming, why would a developer use dictionaries?
6. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
7. Which statement best describes list comprehensions in Python Programming?
8. Which option is a correct use case for decorators in Python Programming? (variation 98)
9. Which option is a correct use case for classes in Python Programming? (variation 353)
10. What is the most accurate beginner-level explanation of function parameters? (variation 92)
11. When working with Python Programming, why would a developer use dictionaries? (variation 351)
12. Which option is a correct use case for classes in Python Programming?
13. Which statement best describes list comprehensions in Python Programming? (variation 100)
14. When working with Python Programming, why would a developer use virtual environments?
15. What is the most accurate beginner-level explanation of function parameters? (variation 352)
16. Which statement best describes modules in Python Programming? (variation 105)
17. When working with Python Programming, why would a developer use dictionaries? (variation 91)

18. Which statement best describes modules in Python Programming?
19. What is the most accurate beginner-level explanation of iterators?
20. A student says 'file handling' is not relevant to real projects. What is the best correction?
21. Which statement best describes list comprehensions in Python Programming? (variation 90)
22. When working with Python Programming, why would a developer use dictionaries? (variation 71)
23. When working with Python Programming, why would a developer use dictionaries? (variation 101)
24. Which statement best describes list comprehensions in Python Programming? (variation 70)
25. Which statement best describes list comprehensions in Python Programming? (variation 80)
26. When working with Python Programming, why would a developer use virtual environments? (variation 96)
27. Which option is a correct use case for decorators in Python Programming? (variation 108)
28. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
29. What is the most accurate beginner-level explanation of function parameters? (variation 102)
30. When working with Python Programming, why would a developer use dictionaries? (variation 81)
31. When working with Python Programming, why would a developer use virtual environments? (variation 356)
32. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
33. Which option is a correct use case for decorators in Python Programming?
34. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
35. What is the most accurate beginner-level explanation of iterators? (variation 87)
36. What is the most accurate beginner-level explanation of iterators? (variation 107)

37. Which option is a correct use case for decorators in Python Programming? (variation 88)
38. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
39. A student says 'exceptions' is not relevant to real projects. What is the best correction?
40. Which statement best describes modules in Python Programming? (variation 95)
41. What is the most accurate beginner-level explanation of iterators? (variation 357)
42. Which option is a correct use case for classes in Python Programming? (variation 83)
43. Which statement best describes list comprehensions in Python Programming? (variation 350)
44. Which option is a correct use case for classes in Python Programming? (variation 103)
45. Which statement best describes modules in Python Programming? (variation 355)
46. Which option is a correct use case for classes in Python Programming? (variation 73)
47. What is the most accurate beginner-level explanation of iterators? (variation 97)
48. When working with Python Programming, why would a developer use virtual environments? (variation 106)
49. What is the most accurate beginner-level explanation of iterators? (variation 77)
50. Which option is a correct use case for decorators in Python Programming? (variation 78)
51. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
52. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
53. Which option is a correct use case for classes in Python Programming? (variation 93)
54. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
55. Which option is a correct use case for decorators in Python Programming? (variation 358)

56. What is the most accurate beginner-level explanation of function parameters? (variation 72)

57. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)

58. What is the most accurate beginner-level explanation of function parameters?

59. When working with Python Programming, why would a developer use virtual environments? (variation 76)

60. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
