

NEET Previous Year Practice 2025 (2025)

Subject: General | Topic: Python Programming

1. Which statement best describes modules in Python Programming? (variation 95)
2. Which option is a correct use case for decorators in Python Programming? (variation 98)
3. When working with Python Programming, why would a developer use dictionaries? (variation 351)
4. What is the most accurate beginner-level explanation of function parameters?
5. When working with Python Programming, why would a developer use virtual environments? (variation 76)
6. When working with Python Programming, why would a developer use virtual environments? (variation 86)
7. Which statement best describes modules in Python Programming? (variation 105)
8. Which option is a correct use case for decorators in Python Programming? (variation 108)
9. Which option is a correct use case for classes in Python Programming?
10. When working with Python Programming, why would a developer use virtual environments? (variation 106)
11. What is the most accurate beginner-level explanation of function parameters? (variation 102)
12. Which statement best describes list comprehensions in Python Programming? (variation 70)
13. A student says 'file handling' is not relevant to real projects. What is the best correction?
14. When working with Python Programming, why would a developer use dictionaries? (variation 91)
15. Which option is a correct use case for classes in Python Programming? (variation 93)
16. What is the most accurate beginner-level explanation of function parameters? (variation 92)
17. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)

18. What is the most accurate beginner-level explanation of function parameters? (variation 352)
19. What is the most accurate beginner-level explanation of function parameters? (variation 82)
20. When working with Python Programming, why would a developer use dictionaries?
21. Which option is a correct use case for decorators in Python Programming? (variation 78)
22. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
23. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
24. Which statement best describes list comprehensions in Python Programming? (variation 100)
25. Which statement best describes list comprehensions in Python Programming? (variation 90)
26. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
27. What is the most accurate beginner-level explanation of iterators? (variation 77)
28. Which option is a correct use case for decorators in Python Programming? (variation 88)
29. What is the most accurate beginner-level explanation of iterators?
30. When working with Python Programming, why would a developer use virtual environments?
31. What is the most accurate beginner-level explanation of iterators? (variation 97)
32. Which option is a correct use case for classes in Python Programming? (variation 353)
33. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
34. Which option is a correct use case for classes in Python Programming? (variation 83)
35. When working with Python Programming, why would a developer use virtual environments? (variation 96)
36. What is the most accurate beginner-level explanation of iterators? (variation 357)

37. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
38. Which statement best describes modules in Python Programming?
39. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
40. When working with Python Programming, why would a developer use virtual environments? (variation 356)
41. What is the most accurate beginner-level explanation of function parameters? (variation 72)
42. Which option is a correct use case for decorators in Python Programming?
43. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
44. Which statement best describes modules in Python Programming? (variation 85)
45. When working with Python Programming, why would a developer use dictionaries? (variation 101)
46. A student says 'exceptions' is not relevant to real projects. What is the best correction?
47. What is the most accurate beginner-level explanation of iterators? (variation 107)
48. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
49. Which option is a correct use case for classes in Python Programming? (variation 73)
50. Which statement best describes modules in Python Programming? (variation 75)
51. When working with Python Programming, why would a developer use dictionaries? (variation 71)
52. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
53. Which statement best describes list comprehensions in Python Programming?
54. Which statement best describes modules in Python Programming? (variation 355)
55. Which option is a correct use case for decorators in Python Programming? (variation 358)

56. What is the most accurate beginner-level explanation of iterators? (variation 87)

57. Which statement best describes list comprehensions in Python Programming? (variation 80)

58. When working with Python Programming, why would a developer use dictionaries? (variation 81)

59. Which option is a correct use case for classes in Python Programming? (variation 103)

60. Which statement best describes list comprehensions in Python Programming? (variation 350)
