

UPSC Previous Year Practice 2019 (2019)

Subject: General | Topic: Python Programming

1. What is the most accurate beginner-level explanation of iterators? (variation 77)
2. Which option is a correct use case for classes in Python Programming? (variation 83)
3. Which statement best describes list comprehensions in Python Programming? (variation 80)
4. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
5. Which statement best describes modules in Python Programming? (variation 85)
6. Which statement best describes list comprehensions in Python Programming? (variation 90)
7. Which statement best describes modules in Python Programming? (variation 75)
8. Which option is a correct use case for decorators in Python Programming? (variation 78)
9. What is the most accurate beginner-level explanation of function parameters? (variation 82)
10. What is the most accurate beginner-level explanation of function parameters? (variation 102)
11. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
12. When working with Python Programming, why would a developer use virtual environments? (variation 106)
13. Which option is a correct use case for decorators in Python Programming? (variation 88)
14. Which statement best describes modules in Python Programming?
15. When working with Python Programming, why would a developer use dictionaries? (variation 101)
16. Which statement best describes modules in Python Programming? (variation 95)
17. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)

18. When working with Python Programming, why would a developer use virtual environments? (variation 76)
19. What is the most accurate beginner-level explanation of iterators? (variation 357)
20. Which option is a correct use case for classes in Python Programming?
21. When working with Python Programming, why would a developer use dictionaries? (variation 351)
22. What is the most accurate beginner-level explanation of function parameters? (variation 92)
23. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
24. What is the most accurate beginner-level explanation of function parameters? (variation 72)
25. Which option is a correct use case for classes in Python Programming? (variation 103)
26. What is the most accurate beginner-level explanation of function parameters?
27. Which option is a correct use case for decorators in Python Programming? (variation 358)
28. Which statement best describes list comprehensions in Python Programming? (variation 350)
29. Which statement best describes modules in Python Programming? (variation 105)
30. Which option is a correct use case for classes in Python Programming? (variation 93)
31. When working with Python Programming, why would a developer use virtual environments?
32. When working with Python Programming, why would a developer use dictionaries? (variation 81)
33. Which statement best describes list comprehensions in Python Programming? (variation 70)
34. Which option is a correct use case for decorators in Python Programming? (variation 98)
35. Which option is a correct use case for decorators in Python Programming? (variation 108)
36. When working with Python Programming, why would a developer use dictionaries? (variation 71)

37. Which option is a correct use case for classes in Python Programming? (variation 353)
38. When working with Python Programming, why would a developer use virtual environments? (variation 86)
39. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
40. What is the most accurate beginner-level explanation of function parameters? (variation 352)
41. When working with Python Programming, why would a developer use dictionaries? (variation 91)
42. A student says 'exceptions' is not relevant to real projects. What is the best correction?
43. What is the most accurate beginner-level explanation of iterators? (variation 97)
44. What is the most accurate beginner-level explanation of iterators?
45. A student says 'file handling' is not relevant to real projects. What is the best correction?
46. When working with Python Programming, why would a developer use virtual environments? (variation 96)
47. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
48. When working with Python Programming, why would a developer use dictionaries?
49. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
50. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
51. Which statement best describes list comprehensions in Python Programming? (variation 100)
52. When working with Python Programming, why would a developer use virtual environments? (variation 356)
53. Which statement best describes list comprehensions in Python Programming?
54. Which option is a correct use case for classes in Python Programming? (variation 73)
55. Which statement best describes modules in Python Programming? (variation 355)

56. What is the most accurate beginner-level explanation of iterators? (variation 87)

57. Which option is a correct use case for decorators in Python Programming?

58. What is the most accurate beginner-level explanation of iterators? (variation 107)

59. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)

60. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
