

UPSC Previous Year Practice 2020 (2020)

Subject: General | Topic: Python Programming

1. When working with Python Programming, why would a developer use virtual environments? (variation 76)
2. Which statement best describes list comprehensions in Python Programming? (variation 90)
3. What is the most accurate beginner-level explanation of function parameters? (variation 82)
4. A student says 'file handling' is not relevant to real projects. What is the best correction?
5. When working with Python Programming, why would a developer use dictionaries? (variation 91)
6. What is the most accurate beginner-level explanation of function parameters? (variation 92)
7. Which statement best describes modules in Python Programming? (variation 85)
8. Which option is a correct use case for classes in Python Programming? (variation 73)
9. Which option is a correct use case for decorators in Python Programming? (variation 78)
10. When working with Python Programming, why would a developer use dictionaries? (variation 81)
11. When working with Python Programming, why would a developer use virtual environments?
12. When working with Python Programming, why would a developer use virtual environments? (variation 106)
13. Which statement best describes list comprehensions in Python Programming?
14. Which option is a correct use case for decorators in Python Programming? (variation 98)
15. A student says 'exceptions' is not relevant to real projects. What is the best correction?
16. Which statement best describes modules in Python Programming? (variation 75)
17. Which statement best describes list comprehensions in Python Programming? (variation 80)

18. Which statement best describes list comprehensions in Python Programming? (variation 70)
19. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
20. What is the most accurate beginner-level explanation of function parameters? (variation 352)
21. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
22. Which option is a correct use case for decorators in Python Programming? (variation 88)
23. When working with Python Programming, why would a developer use dictionaries? (variation 351)
24. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
25. Which option is a correct use case for classes in Python Programming? (variation 83)
26. When working with Python Programming, why would a developer use dictionaries? (variation 71)
27. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
28. Which option is a correct use case for classes in Python Programming? (variation 93)
29. What is the most accurate beginner-level explanation of iterators? (variation 87)
30. What is the most accurate beginner-level explanation of iterators? (variation 97)
31. What is the most accurate beginner-level explanation of iterators?
32. When working with Python Programming, why would a developer use virtual environments? (variation 356)
33. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
34. Which option is a correct use case for decorators in Python Programming?
35. When working with Python Programming, why would a developer use dictionaries? (variation 101)
36. Which option is a correct use case for decorators in Python Programming? (variation 358)

37. Which option is a correct use case for decorators in Python Programming? (variation 108)
38. Which statement best describes modules in Python Programming? (variation 95)
39. Which statement best describes modules in Python Programming?
40. Which statement best describes list comprehensions in Python Programming? (variation 100)
41. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
42. Which statement best describes modules in Python Programming? (variation 105)
43. Which option is a correct use case for classes in Python Programming? (variation 353)
44. Which option is a correct use case for classes in Python Programming?
45. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
46. When working with Python Programming, why would a developer use virtual environments? (variation 86)
47. What is the most accurate beginner-level explanation of iterators? (variation 357)
48. What is the most accurate beginner-level explanation of function parameters?
49. When working with Python Programming, why would a developer use virtual environments? (variation 96)
50. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
51. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
52. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
53. What is the most accurate beginner-level explanation of iterators? (variation 107)
54. What is the most accurate beginner-level explanation of iterators? (variation 77)
55. Which statement best describes modules in Python Programming? (variation 355)

56. What is the most accurate beginner-level explanation of function parameters? (variation 102)

57. What is the most accurate beginner-level explanation of function parameters? (variation 72)

58. Which option is a correct use case for classes in Python Programming? (variation 103)

59. Which statement best describes list comprehensions in Python Programming? (variation 350)

60. When working with Python Programming, why would a developer use dictionaries?
