

UPSC Previous Year Practice 2021 (2021)

Subject: General | Topic: Python Programming

1. What is the most accurate beginner-level explanation of function parameters? (variation 92)
2. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
3. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
4. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
5. When working with Python Programming, why would a developer use dictionaries? (variation 351)
6. Which option is a correct use case for classes in Python Programming? (variation 73)
7. Which statement best describes list comprehensions in Python Programming? (variation 90)
8. Which statement best describes modules in Python Programming? (variation 95)
9. Which statement best describes list comprehensions in Python Programming? (variation 80)
10. When working with Python Programming, why would a developer use virtual environments? (variation 76)
11. Which option is a correct use case for decorators in Python Programming? (variation 98)
12. When working with Python Programming, why would a developer use dictionaries? (variation 71)
13. What is the most accurate beginner-level explanation of iterators?
14. When working with Python Programming, why would a developer use virtual environments?
15. Which statement best describes list comprehensions in Python Programming? (variation 70)
16. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
17. When working with Python Programming, why would a developer use virtual environments? (variation 106)

18. When working with Python Programming, why would a developer use dictionaries? (variation 101)
19. A student says 'exceptions' is not relevant to real projects. What is the best correction?
20. A student says 'file handling' is not relevant to real projects. What is the best correction?
21. Which option is a correct use case for classes in Python Programming?
22. When working with Python Programming, why would a developer use virtual environments? (variation 86)
23. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
24. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
25. Which option is a correct use case for classes in Python Programming? (variation 83)
26. What is the most accurate beginner-level explanation of iterators? (variation 97)
27. Which statement best describes modules in Python Programming? (variation 85)
28. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
29. Which statement best describes modules in Python Programming? (variation 75)
30. What is the most accurate beginner-level explanation of function parameters?
31. Which option is a correct use case for decorators in Python Programming? (variation 358)
32. Which statement best describes modules in Python Programming?
33. Which statement best describes modules in Python Programming? (variation 355)
34. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
35. What is the most accurate beginner-level explanation of iterators? (variation 357)
36. What is the most accurate beginner-level explanation of iterators? (variation 87)

37. When working with Python Programming, why would a developer use dictionaries? (variation 81)
38. Which option is a correct use case for decorators in Python Programming?
39. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
40. What is the most accurate beginner-level explanation of function parameters? (variation 72)
41. Which option is a correct use case for classes in Python Programming? (variation 93)
42. Which option is a correct use case for decorators in Python Programming? (variation 88)
43. What is the most accurate beginner-level explanation of function parameters? (variation 102)
44. When working with Python Programming, why would a developer use virtual environments? (variation 96)
45. What is the most accurate beginner-level explanation of function parameters? (variation 352)
46. Which option is a correct use case for classes in Python Programming? (variation 103)
47. What is the most accurate beginner-level explanation of function parameters? (variation 82)
48. Which option is a correct use case for classes in Python Programming? (variation 353)
49. Which option is a correct use case for decorators in Python Programming? (variation 78)
50. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
51. When working with Python Programming, why would a developer use dictionaries? (variation 91)
52. Which statement best describes modules in Python Programming? (variation 105)
53. What is the most accurate beginner-level explanation of iterators? (variation 77)
54. Which option is a correct use case for decorators in Python Programming? (variation 108)
55. When working with Python Programming, why would a developer use virtual environments? (variation 356)

56. Which statement best describes list comprehensions in Python Programming? (variation 100)

57. What is the most accurate beginner-level explanation of iterators? (variation 107)

58. Which statement best describes list comprehensions in Python Programming?

59. When working with Python Programming, why would a developer use dictionaries?

60. Which statement best describes list comprehensions in Python Programming? (variation 350)
