

UPSC Previous Year Practice 2023 (2023)

Subject: General | Topic: Python Programming

1. What is the most accurate beginner-level explanation of iterators? (variation 87)
2. Which statement best describes list comprehensions in Python Programming? (variation 100)
3. What is the most accurate beginner-level explanation of function parameters? (variation 92)
4. A student says 'file handling' is not relevant to real projects. What is the best correction?
5. Which option is a correct use case for classes in Python Programming? (variation 93)
6. When working with Python Programming, why would a developer use dictionaries? (variation 71)
7. What is the most accurate beginner-level explanation of function parameters? (variation 72)
8. When working with Python Programming, why would a developer use virtual environments? (variation 96)
9. Which statement best describes list comprehensions in Python Programming? (variation 90)
10. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
11. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
12. When working with Python Programming, why would a developer use dictionaries?
13. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
14. What is the most accurate beginner-level explanation of function parameters?
15. Which statement best describes list comprehensions in Python Programming? (variation 80)
16. When working with Python Programming, why would a developer use virtual environments? (variation 106)
17. Which option is a correct use case for classes in Python Programming? (variation 353)

18. When working with Python Programming, why would a developer use dictionaries? (variation 91)
19. Which statement best describes modules in Python Programming? (variation 75)
20. Which option is a correct use case for decorators in Python Programming? (variation 78)
21. What is the most accurate beginner-level explanation of iterators? (variation 357)
22. What is the most accurate beginner-level explanation of iterators? (variation 97)
23. A student says 'exceptions' is not relevant to real projects. What is the best correction?
24. What is the most accurate beginner-level explanation of function parameters? (variation 82)
25. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
26. Which statement best describes modules in Python Programming? (variation 85)
27. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
28. Which statement best describes list comprehensions in Python Programming? (variation 350)
29. Which option is a correct use case for classes in Python Programming? (variation 73)
30. Which option is a correct use case for decorators in Python Programming? (variation 88)
31. Which option is a correct use case for classes in Python Programming? (variation 103)
32. Which statement best describes modules in Python Programming? (variation 355)
33. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
34. Which option is a correct use case for classes in Python Programming? (variation 83)
35. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
36. What is the most accurate beginner-level explanation of iterators?

37. Which option is a correct use case for decorators in Python Programming? (variation 358)
38. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
39. Which statement best describes list comprehensions in Python Programming? (variation 70)
40. Which statement best describes modules in Python Programming? (variation 105)
41. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
42. What is the most accurate beginner-level explanation of function parameters? (variation 352)
43. Which option is a correct use case for decorators in Python Programming?
44. When working with Python Programming, why would a developer use dictionaries? (variation 351)
45. What is the most accurate beginner-level explanation of iterators? (variation 77)
46. What is the most accurate beginner-level explanation of iterators? (variation 107)
47. When working with Python Programming, why would a developer use virtual environments? (variation 76)
48. When working with Python Programming, why would a developer use dictionaries? (variation 101)
49. Which option is a correct use case for classes in Python Programming?
50. Which statement best describes list comprehensions in Python Programming?
51. When working with Python Programming, why would a developer use dictionaries? (variation 81)
52. When working with Python Programming, why would a developer use virtual environments? (variation 86)
53. Which option is a correct use case for decorators in Python Programming? (variation 108)
54. When working with Python Programming, why would a developer use virtual environments?
55. Which statement best describes modules in Python Programming? (variation 95)

56. When working with Python Programming, why would a developer use virtual environments? (variation 356)

57. Which option is a correct use case for decorators in Python Programming? (variation 98)

58. Which statement best describes modules in Python Programming?

59. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)

60. What is the most accurate beginner-level explanation of function parameters? (variation 102)
