

UPSC Previous Year Practice 2025 (2025)

Subject: General | Topic: Python Programming

1. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
2. When working with Python Programming, why would a developer use dictionaries? (variation 71)
3. Which option is a correct use case for decorators in Python Programming? (variation 108)
4. Which option is a correct use case for classes in Python Programming? (variation 73)
5. What is the most accurate beginner-level explanation of iterators? (variation 107)
6. Which option is a correct use case for classes in Python Programming? (variation 103)
7. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
8. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
9. Which option is a correct use case for classes in Python Programming? (variation 353)
10. A student says 'file handling' is not relevant to real projects. What is the best correction?
11. Which option is a correct use case for classes in Python Programming? (variation 83)
12. When working with Python Programming, why would a developer use dictionaries? (variation 101)
13. When working with Python Programming, why would a developer use virtual environments? (variation 76)
14. Which statement best describes modules in Python Programming? (variation 75)
15. What is the most accurate beginner-level explanation of function parameters? (variation 92)
16. Which option is a correct use case for decorators in Python Programming? (variation 78)
17. What is the most accurate beginner-level explanation of function parameters? (variation 352)

18. What is the most accurate beginner-level explanation of function parameters?
19. When working with Python Programming, why would a developer use dictionaries? (variation 81)
20. Which statement best describes list comprehensions in Python Programming? (variation 100)
21. What is the most accurate beginner-level explanation of function parameters? (variation 72)
22. Which option is a correct use case for decorators in Python Programming?
23. What is the most accurate beginner-level explanation of function parameters? (variation 82)
24. What is the most accurate beginner-level explanation of iterators? (variation 97)
25. What is the most accurate beginner-level explanation of iterators? (variation 77)
26. Which statement best describes list comprehensions in Python Programming? (variation 350)
27. What is the most accurate beginner-level explanation of iterators? (variation 357)
28. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
29. When working with Python Programming, why would a developer use dictionaries?
30. Which option is a correct use case for classes in Python Programming?
31. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
32. Which option is a correct use case for decorators in Python Programming? (variation 358)
33. Which statement best describes list comprehensions in Python Programming? (variation 70)
34. What is the most accurate beginner-level explanation of iterators?
35. Which option is a correct use case for classes in Python Programming? (variation 93)
36. Which statement best describes list comprehensions in Python Programming? (variation 90)

37. Which statement best describes modules in Python Programming? (variation 355)
38. Which statement best describes modules in Python Programming?
39. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
40. Which statement best describes modules in Python Programming? (variation 105)
41. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
42. Which statement best describes modules in Python Programming? (variation 95)
43. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
44. Which statement best describes list comprehensions in Python Programming?
45. When working with Python Programming, why would a developer use virtual environments? (variation 86)
46. Which statement best describes list comprehensions in Python Programming? (variation 80)
47. When working with Python Programming, why would a developer use virtual environments? (variation 96)
48. A student says 'exceptions' is not relevant to real projects. What is the best correction?
49. Which statement best describes modules in Python Programming? (variation 85)
50. When working with Python Programming, why would a developer use virtual environments? (variation 356)
51. When working with Python Programming, why would a developer use virtual environments?
52. When working with Python Programming, why would a developer use dictionaries? (variation 91)
53. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
54. Which option is a correct use case for decorators in Python Programming? (variation 98)
55. What is the most accurate beginner-level explanation of iterators? (variation 87)

56. When working with Python Programming, why would a developer use virtual environments? (variation 106)

57. When working with Python Programming, why would a developer use dictionaries? (variation 351)

58. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)

59. What is the most accurate beginner-level explanation of function parameters? (variation 102)

60. Which option is a correct use case for decorators in Python Programming? (variation 88)
