

University Exams Previous Year Practice 2017 (2017)

Subject: General | Topic: Python Programming

1. When working with Python Programming, why would a developer use dictionaries? (variation 71)
2. What is the most accurate beginner-level explanation of iterators? (variation 107)
3. What is the most accurate beginner-level explanation of iterators? (variation 97)
4. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
5. When working with Python Programming, why would a developer use dictionaries? (variation 101)
6. When working with Python Programming, why would a developer use dictionaries? (variation 81)
7. What is the most accurate beginner-level explanation of function parameters?
8. Which option is a correct use case for decorators in Python Programming? (variation 108)
9. What is the most accurate beginner-level explanation of iterators? (variation 87)
10. What is the most accurate beginner-level explanation of iterators? (variation 77)
11. What is the most accurate beginner-level explanation of function parameters? (variation 352)
12. What is the most accurate beginner-level explanation of iterators? (variation 357)
13. Which option is a correct use case for classes in Python Programming? (variation 103)
14. Which option is a correct use case for classes in Python Programming? (variation 73)
15. Which option is a correct use case for classes in Python Programming? (variation 83)
16. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
17. What is the most accurate beginner-level explanation of function parameters? (variation 82)

18. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
19. Which option is a correct use case for classes in Python Programming?
20. What is the most accurate beginner-level explanation of function parameters? (variation 92)
21. Which statement best describes list comprehensions in Python Programming?
22. When working with Python Programming, why would a developer use virtual environments? (variation 356)
23. Which statement best describes modules in Python Programming? (variation 355)
24. What is the most accurate beginner-level explanation of function parameters? (variation 72)
25. Which statement best describes list comprehensions in Python Programming? (variation 90)
26. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
27. Which option is a correct use case for decorators in Python Programming? (variation 98)
28. Which option is a correct use case for classes in Python Programming? (variation 93)
29. Which option is a correct use case for classes in Python Programming? (variation 353)
30. Which statement best describes modules in Python Programming? (variation 95)
31. When working with Python Programming, why would a developer use virtual environments? (variation 76)
32. Which statement best describes modules in Python Programming? (variation 85)
33. Which option is a correct use case for decorators in Python Programming? (variation 358)
34. A student says 'exceptions' is not relevant to real projects. What is the best correction?
35. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
36. Which statement best describes list comprehensions in Python Programming? (variation 350)

37. Which statement best describes modules in Python Programming?
38. A student says 'file handling' is not relevant to real projects. What is the best correction?
39. Which statement best describes list comprehensions in Python Programming? (variation 70)
40. When working with Python Programming, why would a developer use dictionaries?
41. Which option is a correct use case for decorators in Python Programming? (variation 78)
42. Which statement best describes list comprehensions in Python Programming? (variation 100)
43. Which statement best describes modules in Python Programming? (variation 105)
44. When working with Python Programming, why would a developer use virtual environments? (variation 86)
45. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
46. When working with Python Programming, why would a developer use virtual environments? (variation 96)
47. What is the most accurate beginner-level explanation of iterators?
48. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
49. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
50. When working with Python Programming, why would a developer use virtual environments? (variation 106)
51. Which option is a correct use case for decorators in Python Programming? (variation 88)
52. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
53. Which statement best describes modules in Python Programming? (variation 75)
54. When working with Python Programming, why would a developer use dictionaries? (variation 351)
55. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)

56. When working with Python Programming, why would a developer use dictionaries? (variation 91)

57. When working with Python Programming, why would a developer use virtual environments?

58. Which statement best describes list comprehensions in Python Programming? (variation 80)

59. What is the most accurate beginner-level explanation of function parameters? (variation 102)

60. Which option is a correct use case for decorators in Python Programming?
