

University Exams Previous Year Practice 2018 (2018)

Subject: General | Topic: Python Programming

1. What is the most accurate beginner-level explanation of function parameters? (variation 82)
2. Which option is a correct use case for classes in Python Programming? (variation 83)
3. Which option is a correct use case for classes in Python Programming? (variation 353)
4. What is the most accurate beginner-level explanation of iterators? (variation 357)
5. When working with Python Programming, why would a developer use virtual environments? (variation 76)
6. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
7. When working with Python Programming, why would a developer use virtual environments? (variation 86)
8. When working with Python Programming, why would a developer use dictionaries? (variation 101)
9. Which option is a correct use case for decorators in Python Programming? (variation 88)
10. What is the most accurate beginner-level explanation of function parameters? (variation 92)
11. What is the most accurate beginner-level explanation of function parameters? (variation 352)
12. Which option is a correct use case for decorators in Python Programming? (variation 78)
13. When working with Python Programming, why would a developer use virtual environments? (variation 106)
14. What is the most accurate beginner-level explanation of function parameters? (variation 102)
15. When working with Python Programming, why would a developer use virtual environments? (variation 356)
16. When working with Python Programming, why would a developer use dictionaries? (variation 91)
17. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)

18. Which option is a correct use case for classes in Python Programming?
19. Which option is a correct use case for decorators in Python Programming? (variation 108)
20. Which statement best describes modules in Python Programming? (variation 75)
21. Which option is a correct use case for decorators in Python Programming? (variation 98)
22. When working with Python Programming, why would a developer use dictionaries?
23. When working with Python Programming, why would a developer use virtual environments? (variation 96)
24. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
25. What is the most accurate beginner-level explanation of iterators? (variation 87)
26. When working with Python Programming, why would a developer use dictionaries? (variation 71)
27. What is the most accurate beginner-level explanation of function parameters? (variation 72)
28. Which statement best describes list comprehensions in Python Programming? (variation 100)
29. Which statement best describes modules in Python Programming? (variation 355)
30. Which option is a correct use case for classes in Python Programming? (variation 73)
31. When working with Python Programming, why would a developer use dictionaries? (variation 81)
32. Which option is a correct use case for decorators in Python Programming? (variation 358)
33. What is the most accurate beginner-level explanation of iterators?
34. Which option is a correct use case for classes in Python Programming? (variation 93)
35. What is the most accurate beginner-level explanation of function parameters?
36. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)

37. Which statement best describes list comprehensions in Python Programming? (variation 90)
38. Which statement best describes list comprehensions in Python Programming? (variation 70)
39. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
40. Which statement best describes modules in Python Programming? (variation 95)
41. Which statement best describes modules in Python Programming?
42. Which statement best describes list comprehensions in Python Programming? (variation 80)
43. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
44. A student says 'exceptions' is not relevant to real projects. What is the best correction?
45. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
46. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
47. Which statement best describes modules in Python Programming? (variation 105)
48. When working with Python Programming, why would a developer use virtual environments?
49. What is the most accurate beginner-level explanation of iterators? (variation 77)
50. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
51. What is the most accurate beginner-level explanation of iterators? (variation 107)
52. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
53. Which statement best describes modules in Python Programming? (variation 85)
54. A student says 'file handling' is not relevant to real projects. What is the best correction?
55. Which statement best describes list comprehensions in Python Programming?

56. What is the most accurate beginner-level explanation of iterators? (variation 97)
57. Which option is a correct use case for decorators in Python Programming?
58. Which statement best describes list comprehensions in Python Programming? (variation 350)
59. Which option is a correct use case for classes in Python Programming? (variation 103)
60. When working with Python Programming, why would a developer use dictionaries? (variation 351)
