

University Exams Previous Year Practice 2019 (2019)

Subject: General | Topic: Python Programming

1. Which option is a correct use case for decorators in Python Programming? (variation 78)
2. When working with Python Programming, why would a developer use dictionaries? (variation 91)
3. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
4. Which option is a correct use case for decorators in Python Programming?
5. Which option is a correct use case for decorators in Python Programming? (variation 98)
6. Which option is a correct use case for classes in Python Programming? (variation 73)
7. What is the most accurate beginner-level explanation of iterators? (variation 97)
8. Which option is a correct use case for classes in Python Programming? (variation 83)
9. Which statement best describes list comprehensions in Python Programming? (variation 350)
10. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
11. Which statement best describes list comprehensions in Python Programming? (variation 90)
12. What is the most accurate beginner-level explanation of function parameters? (variation 82)
13. When working with Python Programming, why would a developer use virtual environments? (variation 96)
14. When working with Python Programming, why would a developer use virtual environments? (variation 356)
15. What is the most accurate beginner-level explanation of iterators? (variation 107)
16. Which statement best describes list comprehensions in Python Programming? (variation 80)
17. Which statement best describes modules in Python Programming?

18. A student says 'exceptions' is not relevant to real projects. What is the best correction?
19. Which option is a correct use case for classes in Python Programming? (variation 103)
20. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
21. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
22. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
23. Which option is a correct use case for classes in Python Programming? (variation 93)
24. Which statement best describes modules in Python Programming? (variation 85)
25. Which statement best describes modules in Python Programming? (variation 355)
26. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
27. Which option is a correct use case for decorators in Python Programming? (variation 108)
28. What is the most accurate beginner-level explanation of function parameters? (variation 72)
29. What is the most accurate beginner-level explanation of iterators? (variation 357)
30. Which option is a correct use case for classes in Python Programming? (variation 353)
31. Which statement best describes modules in Python Programming? (variation 75)
32. Which statement best describes list comprehensions in Python Programming?
33. What is the most accurate beginner-level explanation of function parameters?
34. When working with Python Programming, why would a developer use virtual environments? (variation 106)
35. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
36. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)

37. What is the most accurate beginner-level explanation of function parameters? (variation 92)
38. Which statement best describes list comprehensions in Python Programming? (variation 100)
39. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
40. What is the most accurate beginner-level explanation of iterators?
41. When working with Python Programming, why would a developer use virtual environments?
42. Which option is a correct use case for classes in Python Programming?
43. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
44. Which option is a correct use case for decorators in Python Programming? (variation 88)
45. Which statement best describes list comprehensions in Python Programming? (variation 70)
46. Which statement best describes modules in Python Programming? (variation 95)
47. When working with Python Programming, why would a developer use virtual environments? (variation 86)
48. When working with Python Programming, why would a developer use virtual environments? (variation 76)
49. When working with Python Programming, why would a developer use dictionaries? (variation 351)
50. Which statement best describes modules in Python Programming? (variation 105)
51. What is the most accurate beginner-level explanation of function parameters? (variation 102)
52. When working with Python Programming, why would a developer use dictionaries? (variation 81)
53. When working with Python Programming, why would a developer use dictionaries? (variation 101)
54. When working with Python Programming, why would a developer use dictionaries? (variation 71)
55. What is the most accurate beginner-level explanation of iterators? (variation 77)

56. A student says 'file handling' is not relevant to real projects. What is the best correction?

57. What is the most accurate beginner-level explanation of iterators? (variation 87)

58. What is the most accurate beginner-level explanation of function parameters? (variation 352)

59. When working with Python Programming, why would a developer use dictionaries?

60. Which option is a correct use case for decorators in Python Programming? (variation 358)
