

University Exams Previous Year Practice 2020 (2020)

Subject: General | Topic: Python Programming

1. Which option is a correct use case for classes in Python Programming? (variation 83)
2. Which statement best describes list comprehensions in Python Programming? (variation 100)
3. Which statement best describes list comprehensions in Python Programming? (variation 350)
4. Which statement best describes modules in Python Programming? (variation 75)
5. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
6. Which statement best describes modules in Python Programming? (variation 355)
7. What is the most accurate beginner-level explanation of iterators? (variation 107)
8. Which option is a correct use case for classes in Python Programming?
9. Which statement best describes modules in Python Programming?
10. What is the most accurate beginner-level explanation of iterators? (variation 87)
11. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
12. When working with Python Programming, why would a developer use virtual environments? (variation 106)
13. Which option is a correct use case for decorators in Python Programming?
14. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
15. A student says 'exceptions' is not relevant to real projects. What is the best correction?
16. Which option is a correct use case for decorators in Python Programming? (variation 88)
17. When working with Python Programming, why would a developer use virtual environments? (variation 356)

18. What is the most accurate beginner-level explanation of iterators?
19. When working with Python Programming, why would a developer use virtual environments? (variation 76)
20. What is the most accurate beginner-level explanation of function parameters? (variation 72)
21. Which statement best describes modules in Python Programming? (variation 105)
22. Which option is a correct use case for classes in Python Programming? (variation 103)
23. When working with Python Programming, why would a developer use dictionaries? (variation 351)
24. A student says 'file handling' is not relevant to real projects. What is the best correction?
25. Which option is a correct use case for decorators in Python Programming? (variation 78)
26. Which option is a correct use case for classes in Python Programming? (variation 93)
27. When working with Python Programming, why would a developer use dictionaries? (variation 101)
28. What is the most accurate beginner-level explanation of function parameters?
29. Which statement best describes list comprehensions in Python Programming? (variation 80)
30. Which statement best describes modules in Python Programming? (variation 85)
31. Which option is a correct use case for decorators in Python Programming? (variation 98)
32. What is the most accurate beginner-level explanation of function parameters? (variation 92)
33. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
34. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
35. Which option is a correct use case for classes in Python Programming? (variation 353)
36. When working with Python Programming, why would a developer use virtual environments? (variation 86)

37. When working with Python Programming, why would a developer use dictionaries? (variation 71)
38. What is the most accurate beginner-level explanation of iterators? (variation 357)
39. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
40. Which statement best describes list comprehensions in Python Programming?
41. Which option is a correct use case for decorators in Python Programming? (variation 108)
42. When working with Python Programming, why would a developer use dictionaries? (variation 91)
43. What is the most accurate beginner-level explanation of function parameters? (variation 352)
44. Which statement best describes list comprehensions in Python Programming? (variation 90)
45. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
46. Which option is a correct use case for classes in Python Programming? (variation 73)
47. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
48. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
49. When working with Python Programming, why would a developer use virtual environments?
50. Which statement best describes modules in Python Programming? (variation 95)
51. Which option is a correct use case for decorators in Python Programming? (variation 358)
52. When working with Python Programming, why would a developer use virtual environments? (variation 96)
53. What is the most accurate beginner-level explanation of function parameters? (variation 102)
54. What is the most accurate beginner-level explanation of function parameters? (variation 82)
55. What is the most accurate beginner-level explanation of iterators? (variation 77)

56. What is the most accurate beginner-level explanation of iterators? (variation 97)

57. Which statement best describes list comprehensions in Python Programming? (variation 70)

58. When working with Python Programming, why would a developer use dictionaries? (variation 81)

59. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)

60. When working with Python Programming, why would a developer use dictionaries?
