

University Exams Previous Year Practice 2023 (2023)

Subject: General | Topic: Python Programming

1. Which statement best describes modules in Python Programming? (variation 105)
2. Which statement best describes modules in Python Programming? (variation 75)
3. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
4. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
5. When working with Python Programming, why would a developer use dictionaries? (variation 81)
6. Which statement best describes modules in Python Programming? (variation 85)
7. Which statement best describes modules in Python Programming? (variation 95)
8. What is the most accurate beginner-level explanation of function parameters? (variation 92)
9. When working with Python Programming, why would a developer use dictionaries? (variation 101)
10. Which option is a correct use case for decorators in Python Programming? (variation 98)
11. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
12. Which option is a correct use case for classes in Python Programming? (variation 93)
13. Which option is a correct use case for classes in Python Programming? (variation 103)
14. What is the most accurate beginner-level explanation of iterators? (variation 77)
15. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
16. What is the most accurate beginner-level explanation of iterators? (variation 97)
17. A student says 'file handling' is not relevant to real projects. What is the best correction?

18. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
19. What is the most accurate beginner-level explanation of function parameters? (variation 102)
20. What is the most accurate beginner-level explanation of iterators? (variation 357)
21. A student says 'exceptions' is not relevant to real projects. What is the best correction?
22. Which statement best describes list comprehensions in Python Programming? (variation 100)
23. Which option is a correct use case for decorators in Python Programming? (variation 108)
24. Which option is a correct use case for classes in Python Programming? (variation 73)
25. Which option is a correct use case for decorators in Python Programming?
26. Which statement best describes list comprehensions in Python Programming? (variation 70)
27. When working with Python Programming, why would a developer use dictionaries?
28. When working with Python Programming, why would a developer use virtual environments?
29. Which option is a correct use case for decorators in Python Programming? (variation 88)
30. When working with Python Programming, why would a developer use virtual environments? (variation 76)
31. When working with Python Programming, why would a developer use dictionaries? (variation 91)
32. When working with Python Programming, why would a developer use dictionaries? (variation 71)
33. When working with Python Programming, why would a developer use dictionaries? (variation 351)
34. When working with Python Programming, why would a developer use virtual environments? (variation 356)
35. Which statement best describes list comprehensions in Python Programming? (variation 90)
36. Which statement best describes modules in Python Programming? (variation 355)

37. Which option is a correct use case for decorators in Python Programming? (variation 78)
38. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
39. Which option is a correct use case for classes in Python Programming?
40. Which statement best describes list comprehensions in Python Programming? (variation 350)
41. Which option is a correct use case for classes in Python Programming? (variation 83)
42. Which option is a correct use case for decorators in Python Programming? (variation 358)
43. Which statement best describes list comprehensions in Python Programming? (variation 80)
44. What is the most accurate beginner-level explanation of iterators? (variation 107)
45. What is the most accurate beginner-level explanation of iterators? (variation 87)
46. What is the most accurate beginner-level explanation of function parameters?
47. When working with Python Programming, why would a developer use virtual environments? (variation 86)
48. What is the most accurate beginner-level explanation of function parameters? (variation 72)
49. Which statement best describes list comprehensions in Python Programming?
50. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
51. What is the most accurate beginner-level explanation of function parameters? (variation 352)
52. What is the most accurate beginner-level explanation of function parameters? (variation 82)
53. Which option is a correct use case for classes in Python Programming? (variation 353)
54. When working with Python Programming, why would a developer use virtual environments? (variation 106)
55. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)

56. Which statement best describes modules in Python Programming?

57. When working with Python Programming, why would a developer use virtual environments? (variation 96)

58. What is the most accurate beginner-level explanation of iterators?

59. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)

60. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
