

University Exams Previous Year Practice 2025 (2025)

Subject: General | Topic: Python Programming

1. Which statement best describes modules in Python Programming?
2. When working with Python Programming, why would a developer use virtual environments?
3. What is the most accurate beginner-level explanation of iterators? (variation 97)
4. What is the most accurate beginner-level explanation of function parameters? (variation 92)
5. Which option is a correct use case for classes in Python Programming? (variation 93)
6. Which statement best describes modules in Python Programming? (variation 95)
7. Which option is a correct use case for classes in Python Programming?
8. Which option is a correct use case for classes in Python Programming? (variation 353)
9. What is the most accurate beginner-level explanation of function parameters?
10. Which option is a correct use case for decorators in Python Programming? (variation 78)
11. What is the most accurate beginner-level explanation of iterators? (variation 107)
12. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 74)
13. Which statement best describes list comprehensions in Python Programming? (variation 90)
14. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 84)
15. What is the most accurate beginner-level explanation of iterators? (variation 357)
16. When working with Python Programming, why would a developer use dictionaries? (variation 351)
17. Which option is a correct use case for decorators in Python Programming? (variation 358)

18. Which statement best describes list comprehensions in Python Programming? (variation 70)
19. Which option is a correct use case for classes in Python Programming? (variation 73)
20. Which statement best describes modules in Python Programming? (variation 85)
21. When working with Python Programming, why would a developer use dictionaries?
22. A student says 'exceptions' is not relevant to real projects. What is the best correction?
23. What is the most accurate beginner-level explanation of function parameters? (variation 72)
24. Which statement best describes list comprehensions in Python Programming? (variation 350)
25. What is the most accurate beginner-level explanation of function parameters? (variation 102)
26. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 109)
27. Which option is a correct use case for decorators in Python Programming? (variation 88)
28. When working with Python Programming, why would a developer use dictionaries? (variation 81)
29. Which option is a correct use case for decorators in Python Programming?
30. What is the most accurate beginner-level explanation of function parameters? (variation 352)
31. What is the most accurate beginner-level explanation of iterators? (variation 87)
32. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 89)
33. When working with Python Programming, why would a developer use dictionaries? (variation 91)
34. Which statement best describes modules in Python Programming? (variation 75)
35. When working with Python Programming, why would a developer use dictionaries? (variation 71)
36. When working with Python Programming, why would a developer use virtual environments? (variation 96)

37. What is the most accurate beginner-level explanation of function parameters? (variation 82)
38. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 94)
39. Which statement best describes list comprehensions in Python Programming? (variation 80)
40. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 79)
41. When working with Python Programming, why would a developer use virtual environments? (variation 86)
42. What is the most accurate beginner-level explanation of iterators? (variation 77)
43. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 359)
44. Which option is a correct use case for decorators in Python Programming? (variation 108)
45. Which option is a correct use case for classes in Python Programming? (variation 103)
46. When working with Python Programming, why would a developer use virtual environments? (variation 106)
47. When working with Python Programming, why would a developer use dictionaries? (variation 101)
48. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 104)
49. A student says 'file handling' is not relevant to real projects. What is the best correction? (variation 99)
50. Which option is a correct use case for classes in Python Programming? (variation 83)
51. Which statement best describes modules in Python Programming? (variation 355)
52. A student says 'exceptions' is not relevant to real projects. What is the best correction? (variation 354)
53. Which option is a correct use case for decorators in Python Programming? (variation 98)
54. What is the most accurate beginner-level explanation of iterators?
55. Which statement best describes list comprehensions in Python Programming?

56. A student says 'file handling' is not relevant to real projects. What is the best correction?

57. Which statement best describes list comprehensions in Python Programming? (variation 100)

58. When working with Python Programming, why would a developer use virtual environments? (variation 356)

59. When working with Python Programming, why would a developer use virtual environments? (variation 76)

60. Which statement best describes modules in Python Programming? (variation 105)
