

CBSE Previous Year Practice 2017 (2017)

Subject: General | Topic: C Programming

1. What is the most accurate beginner-level explanation of malloc? (variation 72)
2. Which statement best describes the stack in C Programming?
3. Which statement best describes the stack in C Programming? (variation 85)
4. What is the most accurate beginner-level explanation of malloc? (variation 102)
5. When working with C Programming, why would a developer use null terminator? (variation 76)
6. What is the most accurate beginner-level explanation of pass by pointer?
7. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
8. When working with C Programming, why would a developer use arrays?
9. When working with C Programming, why would a developer use arrays? (variation 101)
10. Which statement best describes pointers in C Programming? (variation 80)
11. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
12. When working with C Programming, why would a developer use arrays? (variation 91)
13. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
14. Which statement best describes pointers in C Programming? (variation 350)
15. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
16. Which option is a correct use case for structs in C Programming?
17. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)

18. When working with C Programming, why would a developer use null terminator? (variation 86)
19. Which option is a correct use case for structs in C Programming? (variation 93)
20. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
21. Which statement best describes pointers in C Programming? (variation 70)
22. What is the most accurate beginner-level explanation of malloc?
23. Which option is a correct use case for structs in C Programming? (variation 73)
24. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
25. Which statement best describes the stack in C Programming? (variation 105)
26. What is the most accurate beginner-level explanation of malloc? (variation 82)
27. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
28. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
29. When working with C Programming, why would a developer use arrays? (variation 351)
30. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
31. When working with C Programming, why would a developer use null terminator? (variation 356)
32. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
33. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
34. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
35. Which statement best describes pointers in C Programming? (variation 100)
36. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)

37. Which statement best describes the stack in C Programming? (variation 355)
38. Which option is a correct use case for structs in C Programming? (variation 353)
39. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
40. Which statement best describes pointers in C Programming?
41. When working with C Programming, why would a developer use arrays? (variation 71)
42. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
43. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
44. Which statement best describes the stack in C Programming? (variation 75)
45. When working with C Programming, why would a developer use null terminator? (variation 106)
46. When working with C Programming, why would a developer use null terminator? (variation 96)
47. Which statement best describes the stack in C Programming? (variation 95)
48. What is the most accurate beginner-level explanation of malloc? (variation 92)
49. What is the most accurate beginner-level explanation of malloc? (variation 352)
50. Which option is a correct use case for preprocessor macros in C Programming?
51. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
52. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
53. A student says 'header files' is not relevant to real projects. What is the best correction?
54. Which option is a correct use case for structs in C Programming? (variation 103)
55. When working with C Programming, why would a developer use arrays? (variation 81)

56. Which statement best describes pointers in C Programming? (variation 90)

57. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)

58. Which option is a correct use case for structs in C Programming? (variation 83)

59. When working with C Programming, why would a developer use null terminator?

60. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
