

CBSE Previous Year Practice 2019 (2019)

Subject: General | Topic: C Programming

1. Which statement best describes the stack in C Programming? (variation 85)
2. What is the most accurate beginner-level explanation of malloc?
3. What is the most accurate beginner-level explanation of malloc? (variation 92)
4. When working with C Programming, why would a developer use arrays? (variation 91)
5. Which statement best describes pointers in C Programming? (variation 70)
6. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
7. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
8. Which statement best describes the stack in C Programming?
9. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
10. What is the most accurate beginner-level explanation of malloc? (variation 72)
11. When working with C Programming, why would a developer use arrays? (variation 351)
12. When working with C Programming, why would a developer use arrays?
13. When working with C Programming, why would a developer use null terminator? (variation 106)
14. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
15. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
16. Which statement best describes pointers in C Programming? (variation 350)
17. Which statement best describes the stack in C Programming? (variation 95)

18. Which option is a correct use case for structs in C Programming? (variation 353)
19. When working with C Programming, why would a developer use null terminator? (variation 76)
20. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
21. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
22. When working with C Programming, why would a developer use null terminator? (variation 96)
23. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
24. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
25. Which statement best describes pointers in C Programming?
26. When working with C Programming, why would a developer use null terminator?
27. When working with C Programming, why would a developer use arrays? (variation 101)
28. Which option is a correct use case for structs in C Programming? (variation 73)
29. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
30. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
31. What is the most accurate beginner-level explanation of malloc? (variation 102)
32. When working with C Programming, why would a developer use arrays? (variation 81)
33. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
34. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
35. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
36. Which option is a correct use case for structs in C Programming? (variation 83)

37. What is the most accurate beginner-level explanation of malloc? (variation 82)
38. Which option is a correct use case for preprocessor macros in C Programming?
39. Which option is a correct use case for structs in C Programming?
40. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
41. Which option is a correct use case for structs in C Programming? (variation 93)
42. Which statement best describes pointers in C Programming? (variation 90)
43. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
44. Which statement best describes the stack in C Programming? (variation 355)
45. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
46. Which option is a correct use case for structs in C Programming? (variation 103)
47. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
48. Which statement best describes pointers in C Programming? (variation 80)
49. When working with C Programming, why would a developer use null terminator? (variation 86)
50. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
51. A student says 'header files' is not relevant to real projects. What is the best correction?
52. Which statement best describes pointers in C Programming? (variation 100)
53. When working with C Programming, why would a developer use null terminator? (variation 356)
54. Which statement best describes the stack in C Programming? (variation 75)
55. What is the most accurate beginner-level explanation of malloc? (variation 352)

56. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
57. What is the most accurate beginner-level explanation of pass by pointer?
58. Which statement best describes the stack in C Programming? (variation 105)
59. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
60. When working with C Programming, why would a developer use arrays? (variation 71)
