

CBSE Previous Year Practice 2021 (2021)

Subject: General | Topic: C Programming

1. Which statement best describes pointers in C Programming? (variation 90)
2. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
3. Which option is a correct use case for structs in C Programming? (variation 83)
4. What is the most accurate beginner-level explanation of pass by pointer?
5. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
6. What is the most accurate beginner-level explanation of malloc? (variation 72)
7. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
8. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
9. Which option is a correct use case for structs in C Programming? (variation 103)
10. When working with C Programming, why would a developer use null terminator? (variation 106)
11. When working with C Programming, why would a developer use arrays?
12. When working with C Programming, why would a developer use null terminator? (variation 96)
13. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
14. When working with C Programming, why would a developer use arrays? (variation 351)
15. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
16. What is the most accurate beginner-level explanation of malloc? (variation 92)
17. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)

18. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
19. Which statement best describes the stack in C Programming? (variation 85)
20. Which statement best describes pointers in C Programming? (variation 350)
21. Which option is a correct use case for structs in C Programming? (variation 93)
22. When working with C Programming, why would a developer use arrays? (variation 71)
23. What is the most accurate beginner-level explanation of malloc?
24. Which statement best describes pointers in C Programming? (variation 70)
25. When working with C Programming, why would a developer use arrays? (variation 101)
26. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
27. Which statement best describes the stack in C Programming? (variation 355)
28. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
29. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
30. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
31. A student says 'header files' is not relevant to real projects. What is the best correction?
32. Which statement best describes pointers in C Programming? (variation 80)
33. Which statement best describes pointers in C Programming?
34. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
35. Which option is a correct use case for preprocessor macros in C Programming?
36. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

37. What is the most accurate beginner-level explanation of malloc? (variation 82)
38. What is the most accurate beginner-level explanation of malloc? (variation 102)
39. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
40. Which statement best describes the stack in C Programming? (variation 95)
41. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
42. When working with C Programming, why would a developer use null terminator? (variation 356)
43. When working with C Programming, why would a developer use arrays? (variation 91)
44. Which statement best describes the stack in C Programming? (variation 105)
45. Which statement best describes pointers in C Programming? (variation 100)
46. Which statement best describes the stack in C Programming?
47. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
48. What is the most accurate beginner-level explanation of malloc? (variation 352)
49. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
50. When working with C Programming, why would a developer use arrays? (variation 81)
51. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
52. Which statement best describes the stack in C Programming? (variation 75)
53. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
54. When working with C Programming, why would a developer use null terminator? (variation 76)
55. Which option is a correct use case for structs in C Programming? (variation 73)

56. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)

57. Which option is a correct use case for structs in C Programming? (variation 353)

58. Which option is a correct use case for structs in C Programming?

59. When working with C Programming, why would a developer use null terminator? (variation 86)

60. When working with C Programming, why would a developer use null terminator?
