

CBSE Previous Year Practice 2023 (2023)

Subject: General | Topic: C Programming

1. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
2. Which statement best describes pointers in C Programming?
3. When working with C Programming, why would a developer use arrays?
4. Which statement best describes pointers in C Programming? (variation 350)
5. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
6. Which option is a correct use case for structs in C Programming? (variation 103)
7. When working with C Programming, why would a developer use null terminator? (variation 356)
8. When working with C Programming, why would a developer use arrays? (variation 91)
9. When working with C Programming, why would a developer use arrays? (variation 351)
10. What is the most accurate beginner-level explanation of pass by pointer?
11. Which statement best describes the stack in C Programming? (variation 105)
12. Which statement best describes pointers in C Programming? (variation 80)
13. Which statement best describes pointers in C Programming? (variation 90)
14. What is the most accurate beginner-level explanation of malloc?
15. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
16. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
17. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)

18. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
19. What is the most accurate beginner-level explanation of malloc? (variation 72)
20. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
21. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
22. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
23. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
24. Which option is a correct use case for structs in C Programming? (variation 93)
25. Which statement best describes the stack in C Programming? (variation 95)
26. Which statement best describes the stack in C Programming?
27. When working with C Programming, why would a developer use null terminator? (variation 76)
28. Which option is a correct use case for structs in C Programming? (variation 353)
29. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
30. When working with C Programming, why would a developer use null terminator? (variation 86)
31. Which option is a correct use case for structs in C Programming? (variation 83)
32. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
33. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
34. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
35. Which option is a correct use case for structs in C Programming? (variation 73)
36. Which statement best describes the stack in C Programming? (variation 75)

37. Which option is a correct use case for preprocessor macros in C Programming?
38. What is the most accurate beginner-level explanation of malloc? (variation 92)
39. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
40. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
41. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
42. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
43. Which statement best describes pointers in C Programming? (variation 70)
44. Which option is a correct use case for structs in C Programming?
45. When working with C Programming, why would a developer use arrays? (variation 101)
46. Which statement best describes the stack in C Programming? (variation 355)
47. Which statement best describes pointers in C Programming? (variation 100)
48. Which statement best describes the stack in C Programming? (variation 85)
49. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
50. When working with C Programming, why would a developer use null terminator? (variation 106)
51. When working with C Programming, why would a developer use null terminator?
52. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
53. What is the most accurate beginner-level explanation of malloc? (variation 352)
54. What is the most accurate beginner-level explanation of malloc? (variation 102)
55. When working with C Programming, why would a developer use arrays? (variation 71)

56. A student says 'header files' is not relevant to real projects. What is the best correction?
57. What is the most accurate beginner-level explanation of malloc? (variation 82)
58. When working with C Programming, why would a developer use arrays? (variation 81)
59. When working with C Programming, why would a developer use null terminator? (variation 96)
60. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
