

CBSE Previous Year Practice 2024 (2024)

Subject: General | Topic: C Programming

1. When working with C Programming, why would a developer use arrays? (variation 101)
2. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
3. What is the most accurate beginner-level explanation of pass by pointer?
4. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
5. When working with C Programming, why would a developer use null terminator? (variation 86)
6. Which statement best describes the stack in C Programming? (variation 95)
7. Which statement best describes pointers in C Programming? (variation 80)
8. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
9. Which statement best describes pointers in C Programming? (variation 90)
10. Which statement best describes the stack in C Programming? (variation 105)
11. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
12. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
13. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
14. Which statement best describes pointers in C Programming? (variation 100)
15. Which statement best describes the stack in C Programming? (variation 85)
16. Which option is a correct use case for structs in C Programming? (variation 83)
17. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?

18. Which statement best describes pointers in C Programming? (variation 70)
19. When working with C Programming, why would a developer use null terminator? (variation 96)
20. Which option is a correct use case for preprocessor macros in C Programming?
21. When working with C Programming, why would a developer use arrays?
22. Which option is a correct use case for structs in C Programming? (variation 353)
23. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
24. Which statement best describes the stack in C Programming? (variation 355)
25. What is the most accurate beginner-level explanation of malloc? (variation 72)
26. When working with C Programming, why would a developer use arrays? (variation 71)
27. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
28. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
29. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
30. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
31. Which statement best describes the stack in C Programming? (variation 75)
32. When working with C Programming, why would a developer use null terminator? (variation 356)
33. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
34. Which option is a correct use case for structs in C Programming? (variation 103)
35. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
36. Which option is a correct use case for structs in C Programming?

37. Which option is a correct use case for structs in C Programming? (variation 93)
38. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
39. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
40. When working with C Programming, why would a developer use arrays? (variation 81)
41. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
42. When working with C Programming, why would a developer use null terminator? (variation 76)
43. A student says 'header files' is not relevant to real projects. What is the best correction?
44. What is the most accurate beginner-level explanation of malloc? (variation 352)
45. Which option is a correct use case for structs in C Programming? (variation 73)
46. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
47. When working with C Programming, why would a developer use arrays? (variation 351)
48. Which statement best describes pointers in C Programming? (variation 350)
49. When working with C Programming, why would a developer use arrays? (variation 91)
50. What is the most accurate beginner-level explanation of malloc? (variation 92)
51. When working with C Programming, why would a developer use null terminator?
52. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
53. What is the most accurate beginner-level explanation of malloc? (variation 102)
54. What is the most accurate beginner-level explanation of malloc? (variation 82)
55. When working with C Programming, why would a developer use null terminator? (variation 106)

56. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)

57. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)

58. Which statement best describes pointers in C Programming?

59. Which statement best describes the stack in C Programming?

60. What is the most accurate beginner-level explanation of malloc?
