

CBSE Previous Year Practice 2025 (2025)

Subject: General | Topic: C Programming

1. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
2. When working with C Programming, why would a developer use null terminator? (variation 86)
3. Which option is a correct use case for structs in C Programming? (variation 93)
4. What is the most accurate beginner-level explanation of malloc?
5. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
6. When working with C Programming, why would a developer use null terminator? (variation 356)
7. What is the most accurate beginner-level explanation of malloc? (variation 82)
8. Which statement best describes pointers in C Programming? (variation 90)
9. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
10. Which option is a correct use case for structs in C Programming? (variation 353)
11. Which statement best describes the stack in C Programming? (variation 105)
12. When working with C Programming, why would a developer use arrays? (variation 101)
13. When working with C Programming, why would a developer use arrays?
14. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
15. What is the most accurate beginner-level explanation of malloc? (variation 352)
16. Which option is a correct use case for structs in C Programming? (variation 83)
17. Which statement best describes the stack in C Programming? (variation 85)

18. When working with C Programming, why would a developer use null terminator? (variation 76)
19. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
20. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
21. When working with C Programming, why would a developer use arrays? (variation 351)
22. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
23. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
24. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
25. What is the most accurate beginner-level explanation of malloc? (variation 102)
26. When working with C Programming, why would a developer use arrays? (variation 71)
27. Which statement best describes pointers in C Programming? (variation 70)
28. When working with C Programming, why would a developer use null terminator? (variation 96)
29. When working with C Programming, why would a developer use null terminator?
30. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
31. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
32. What is the most accurate beginner-level explanation of pass by pointer?
33. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
34. Which option is a correct use case for structs in C Programming? (variation 103)
35. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
36. Which statement best describes pointers in C Programming? (variation 80)

37. Which statement best describes pointers in C Programming? (variation 350)
38. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
39. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
40. A student says 'header files' is not relevant to real projects. What is the best correction?
41. Which statement best describes pointers in C Programming? (variation 100)
42. What is the most accurate beginner-level explanation of malloc? (variation 72)
43. Which option is a correct use case for preprocessor macros in C Programming?
44. When working with C Programming, why would a developer use arrays? (variation 91)
45. Which option is a correct use case for structs in C Programming? (variation 73)
46. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
47. Which option is a correct use case for structs in C Programming?
48. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
49. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
50. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
51. When working with C Programming, why would a developer use arrays? (variation 81)
52. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
53. Which statement best describes the stack in C Programming? (variation 95)
54. Which statement best describes pointers in C Programming?
55. What is the most accurate beginner-level explanation of malloc? (variation 92)

56. Which statement best describes the stack in C Programming?

57. Which statement best describes the stack in C Programming? (variation 75)

58. Which statement best describes the stack in C Programming? (variation 355)

59. When working with C Programming, why would a developer use null terminator? (variation 106)

60. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
