

CBSE Previous Year Practice 2026 (2026)

Subject: General | Topic: C Programming

1. When working with C Programming, why would a developer use arrays? (variation 81)
2. What is the most accurate beginner-level explanation of pass by pointer?
3. What is the most accurate beginner-level explanation of malloc? (variation 72)
4. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
5. Which statement best describes pointers in C Programming?
6. When working with C Programming, why would a developer use arrays?
7. What is the most accurate beginner-level explanation of malloc? (variation 352)
8. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
9. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
10. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
11. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
12. Which statement best describes the stack in C Programming? (variation 85)
13. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
14. When working with C Programming, why would a developer use arrays? (variation 91)
15. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
16. When working with C Programming, why would a developer use null terminator? (variation 356)
17. Which statement best describes pointers in C Programming? (variation 350)

18. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
19. When working with C Programming, why would a developer use null terminator? (variation 86)
20. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
21. When working with C Programming, why would a developer use null terminator? (variation 76)
22. Which statement best describes the stack in C Programming? (variation 95)
23. Which option is a correct use case for structs in C Programming?
24. When working with C Programming, why would a developer use null terminator? (variation 106)
25. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
26. When working with C Programming, why would a developer use arrays? (variation 351)
27. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)
28. Which option is a correct use case for structs in C Programming? (variation 83)
29. Which statement best describes the stack in C Programming? (variation 355)
30. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
31. Which statement best describes the stack in C Programming? (variation 105)
32. When working with C Programming, why would a developer use arrays? (variation 71)
33. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
34. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
35. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
36. Which statement best describes pointers in C Programming? (variation 80)

37. A student says 'header files' is not relevant to real projects. What is the best correction?
38. What is the most accurate beginner-level explanation of malloc?
39. When working with C Programming, why would a developer use null terminator?
40. Which statement best describes the stack in C Programming?
41. When working with C Programming, why would a developer use arrays? (variation 101)
42. Which option is a correct use case for structs in C Programming? (variation 73)
43. What is the most accurate beginner-level explanation of malloc? (variation 82)
44. Which statement best describes pointers in C Programming? (variation 70)
45. Which statement best describes the stack in C Programming? (variation 75)
46. What is the most accurate beginner-level explanation of malloc? (variation 92)
47. Which option is a correct use case for structs in C Programming? (variation 93)
48. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
49. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
50. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
51. Which option is a correct use case for preprocessor macros in C Programming?
52. Which statement best describes pointers in C Programming? (variation 100)
53. What is the most accurate beginner-level explanation of malloc? (variation 102)
54. When working with C Programming, why would a developer use null terminator? (variation 96)
55. Which option is a correct use case for structs in C Programming? (variation 353)

56. Which statement best describes pointers in C Programming? (variation 90)

57. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)

58. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)

59. Which option is a correct use case for structs in C Programming? (variation 103)

60. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
