

ICSE Previous Year Practice 2017 (2017)

Subject: General | Topic: C Programming

1. What is the most accurate beginner-level explanation of pass by pointer? (variation 107)
2. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 359)
3. When working with C Programming, why would a developer use arrays? (variation 91)
4. Which option is a correct use case for structs in C Programming? (variation 93)
5. Which option is a correct use case for preprocessor macros in C Programming? (variation 98)
6. When working with C Programming, why would a developer use arrays?
7. When working with C Programming, why would a developer use null terminator? (variation 106)
8. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 79)
9. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 94)
10. A student says 'header files' is not relevant to real projects. What is the best correction?
11. What is the most accurate beginner-level explanation of malloc?
12. What is the most accurate beginner-level explanation of malloc? (variation 102)
13. When working with C Programming, why would a developer use null terminator? (variation 96)
14. What is the most accurate beginner-level explanation of pass by pointer? (variation 77)
15. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 104)
16. Which statement best describes pointers in C Programming? (variation 100)
17. When working with C Programming, why would a developer use null terminator? (variation 86)

18. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 354)
19. Which option is a correct use case for preprocessor macros in C Programming? (variation 108)
20. When working with C Programming, why would a developer use arrays? (variation 101)
21. When working with C Programming, why would a developer use null terminator? (variation 356)
22. Which option is a correct use case for preprocessor macros in C Programming? (variation 358)
23. When working with C Programming, why would a developer use arrays? (variation 71)
24. When working with C Programming, why would a developer use null terminator? (variation 76)
25. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 99)
26. Which statement best describes pointers in C Programming? (variation 70)
27. Which option is a correct use case for structs in C Programming? (variation 83)
28. Which statement best describes the stack in C Programming? (variation 105)
29. What is the most accurate beginner-level explanation of malloc? (variation 92)
30. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 109)
31. Which option is a correct use case for preprocessor macros in C Programming? (variation 78)
32. Which option is a correct use case for structs in C Programming?
33. Which statement best describes the stack in C Programming? (variation 85)
34. Which option is a correct use case for structs in C Programming? (variation 73)
35. When working with C Programming, why would a developer use arrays? (variation 351)
36. Which statement best describes pointers in C Programming? (variation 80)

37. Which statement best describes the stack in C Programming? (variation 75)
38. When working with C Programming, why would a developer use arrays? (variation 81)
39. Which option is a correct use case for preprocessor macros in C Programming?
40. What is the most accurate beginner-level explanation of pass by pointer? (variation 357)
41. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 84)
42. Which statement best describes pointers in C Programming? (variation 90)
43. Which option is a correct use case for preprocessor macros in C Programming? (variation 88)
44. What is the most accurate beginner-level explanation of malloc? (variation 352)
45. What is the most accurate beginner-level explanation of pass by pointer? (variation 87)
46. What is the most accurate beginner-level explanation of malloc? (variation 82)
47. Which option is a correct use case for structs in C Programming? (variation 103)
48. A student says 'segmentation faults' is not relevant to real projects. What is the best correction?
49. A student says 'header files' is not relevant to real projects. What is the best correction? (variation 74)
50. When working with C Programming, why would a developer use null terminator?
51. A student says 'segmentation faults' is not relevant to real projects. What is the best correction? (variation 89)
52. Which statement best describes the stack in C Programming?
53. Which statement best describes pointers in C Programming? (variation 350)
54. Which statement best describes the stack in C Programming? (variation 355)
55. Which statement best describes the stack in C Programming? (variation 95)

56. What is the most accurate beginner-level explanation of pass by pointer?

57. Which statement best describes pointers in C Programming?

58. What is the most accurate beginner-level explanation of malloc? (variation 72)

59. What is the most accurate beginner-level explanation of pass by pointer? (variation 97)

60. Which option is a correct use case for structs in C Programming? (variation 353)
